

JERSEY SKATEPARK

NOVEMBER 2018

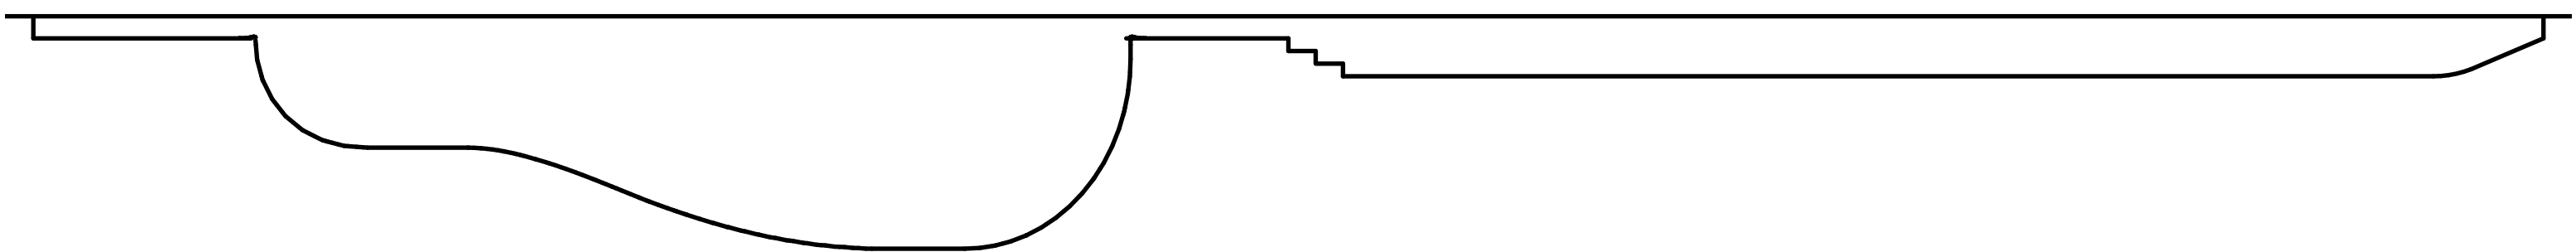

**JERSEY
SPORT** 

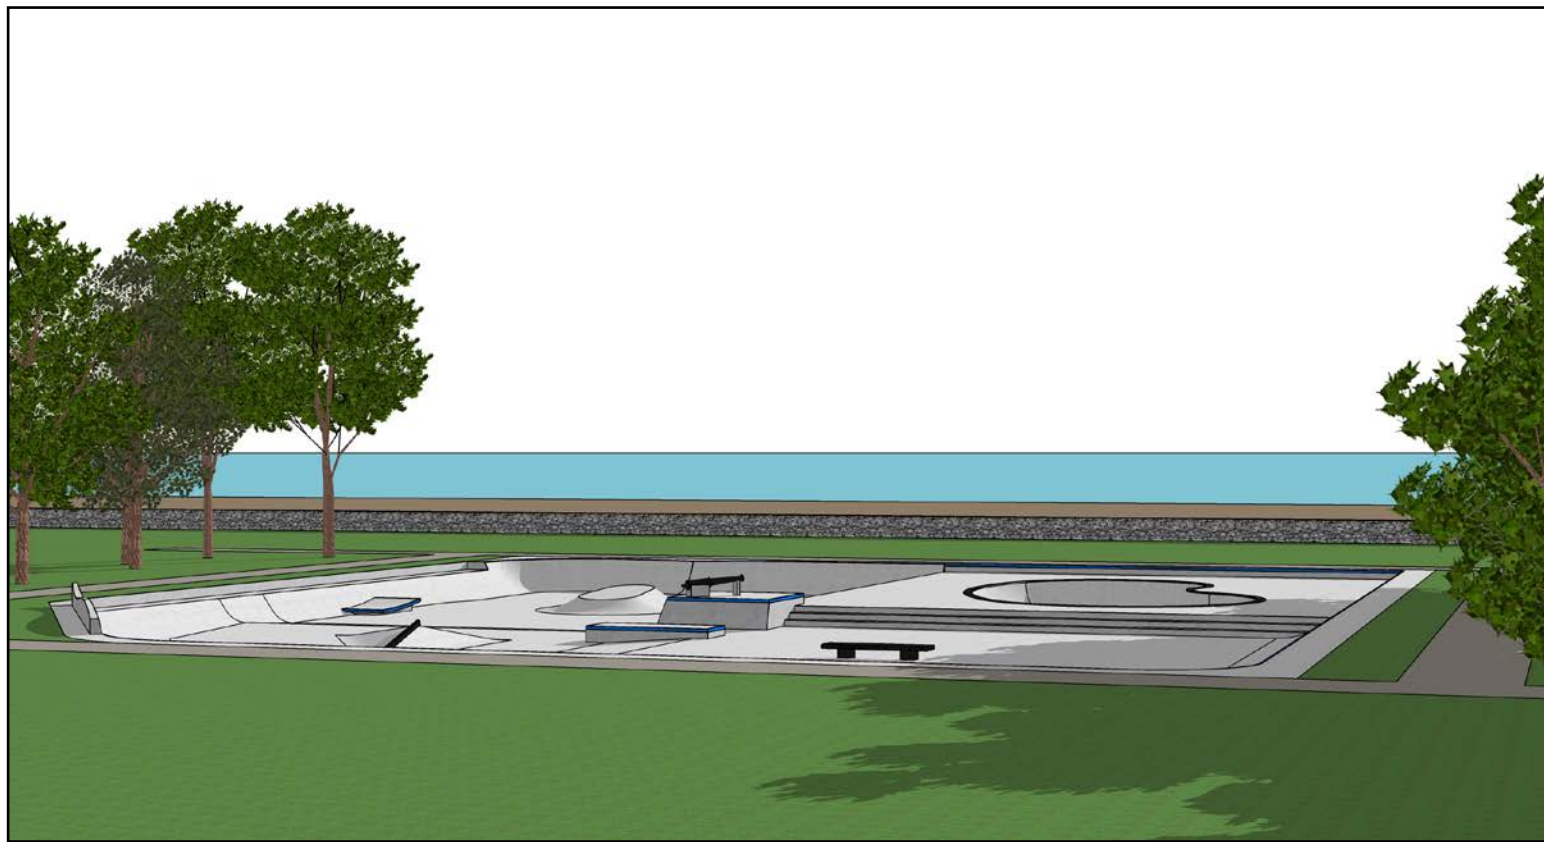

LOCATION 1

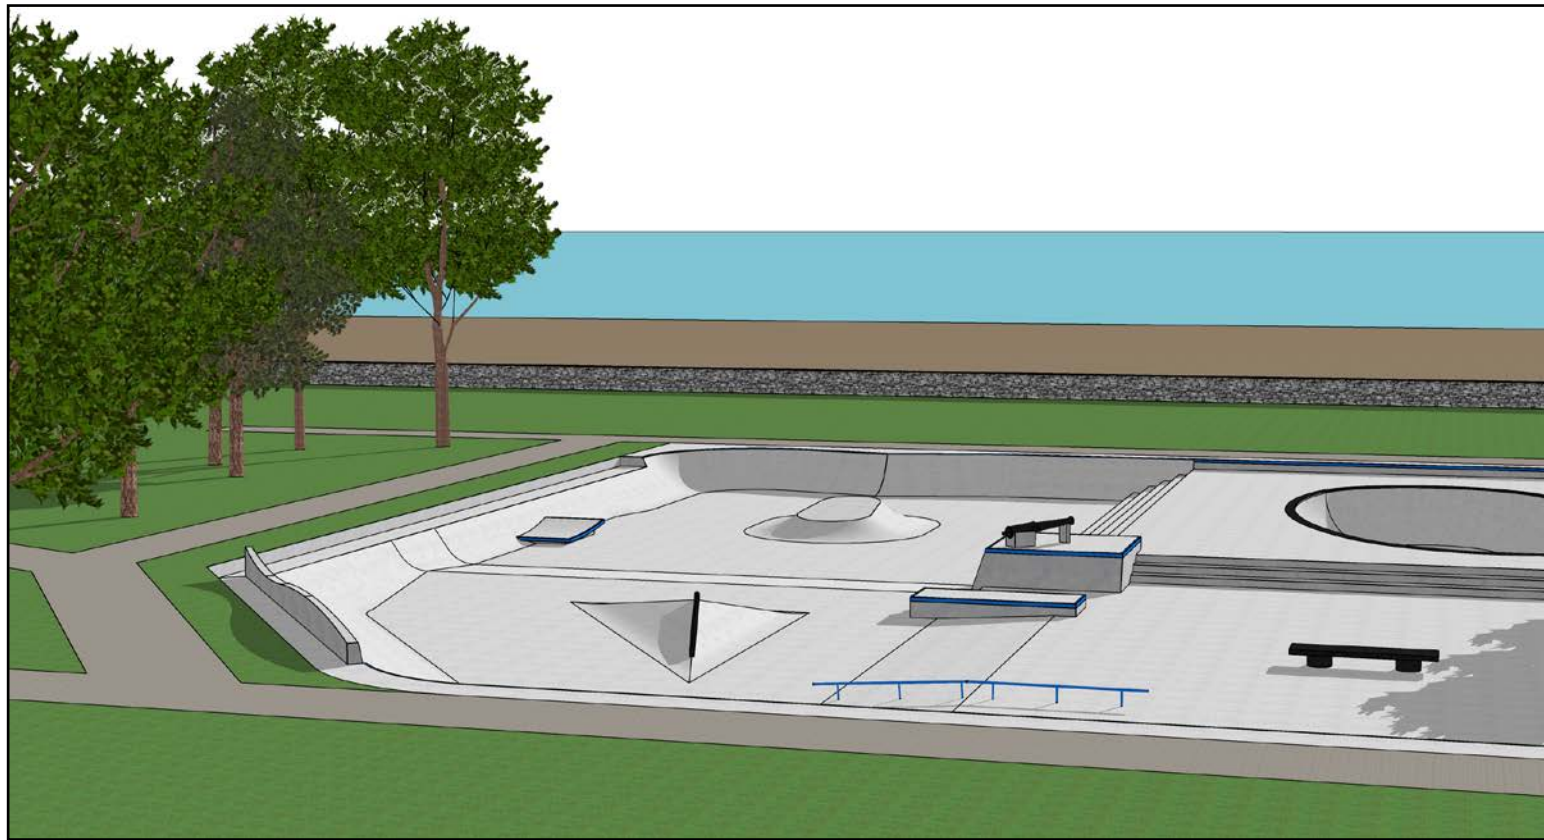

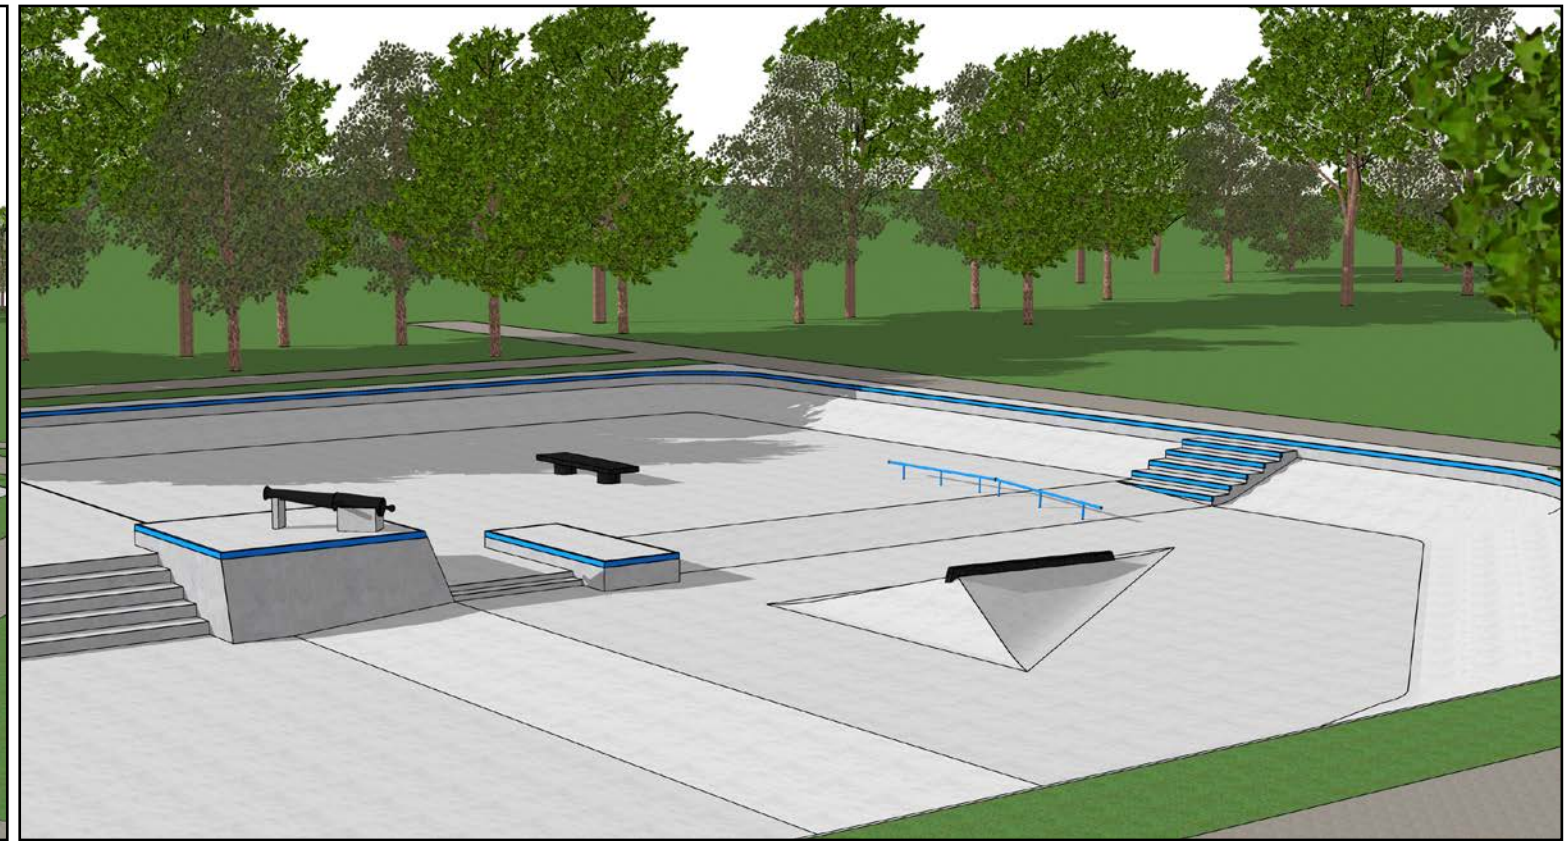

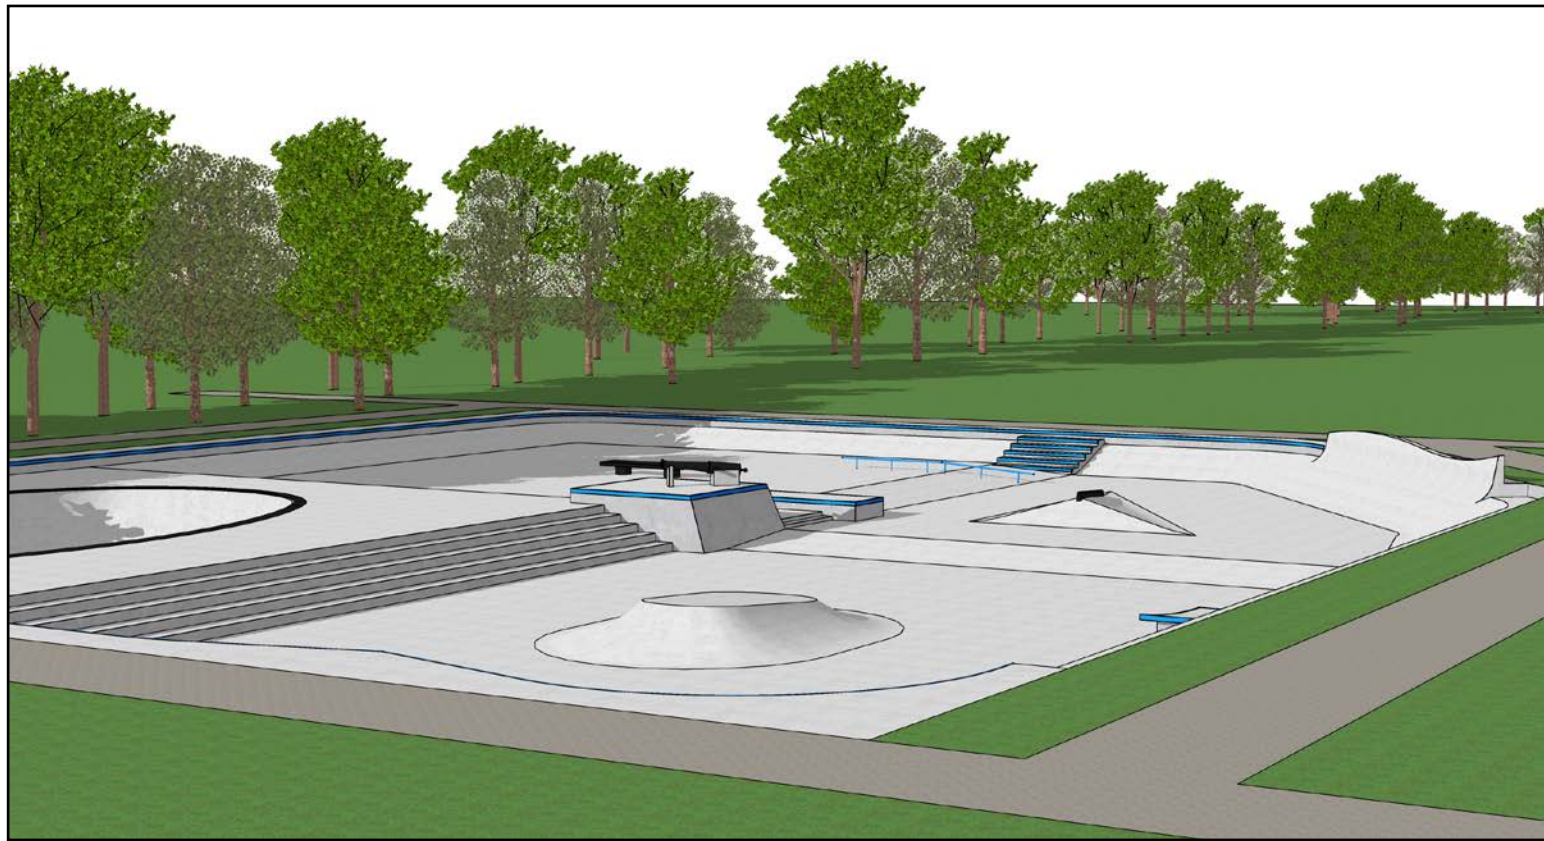

CORONATION PARK

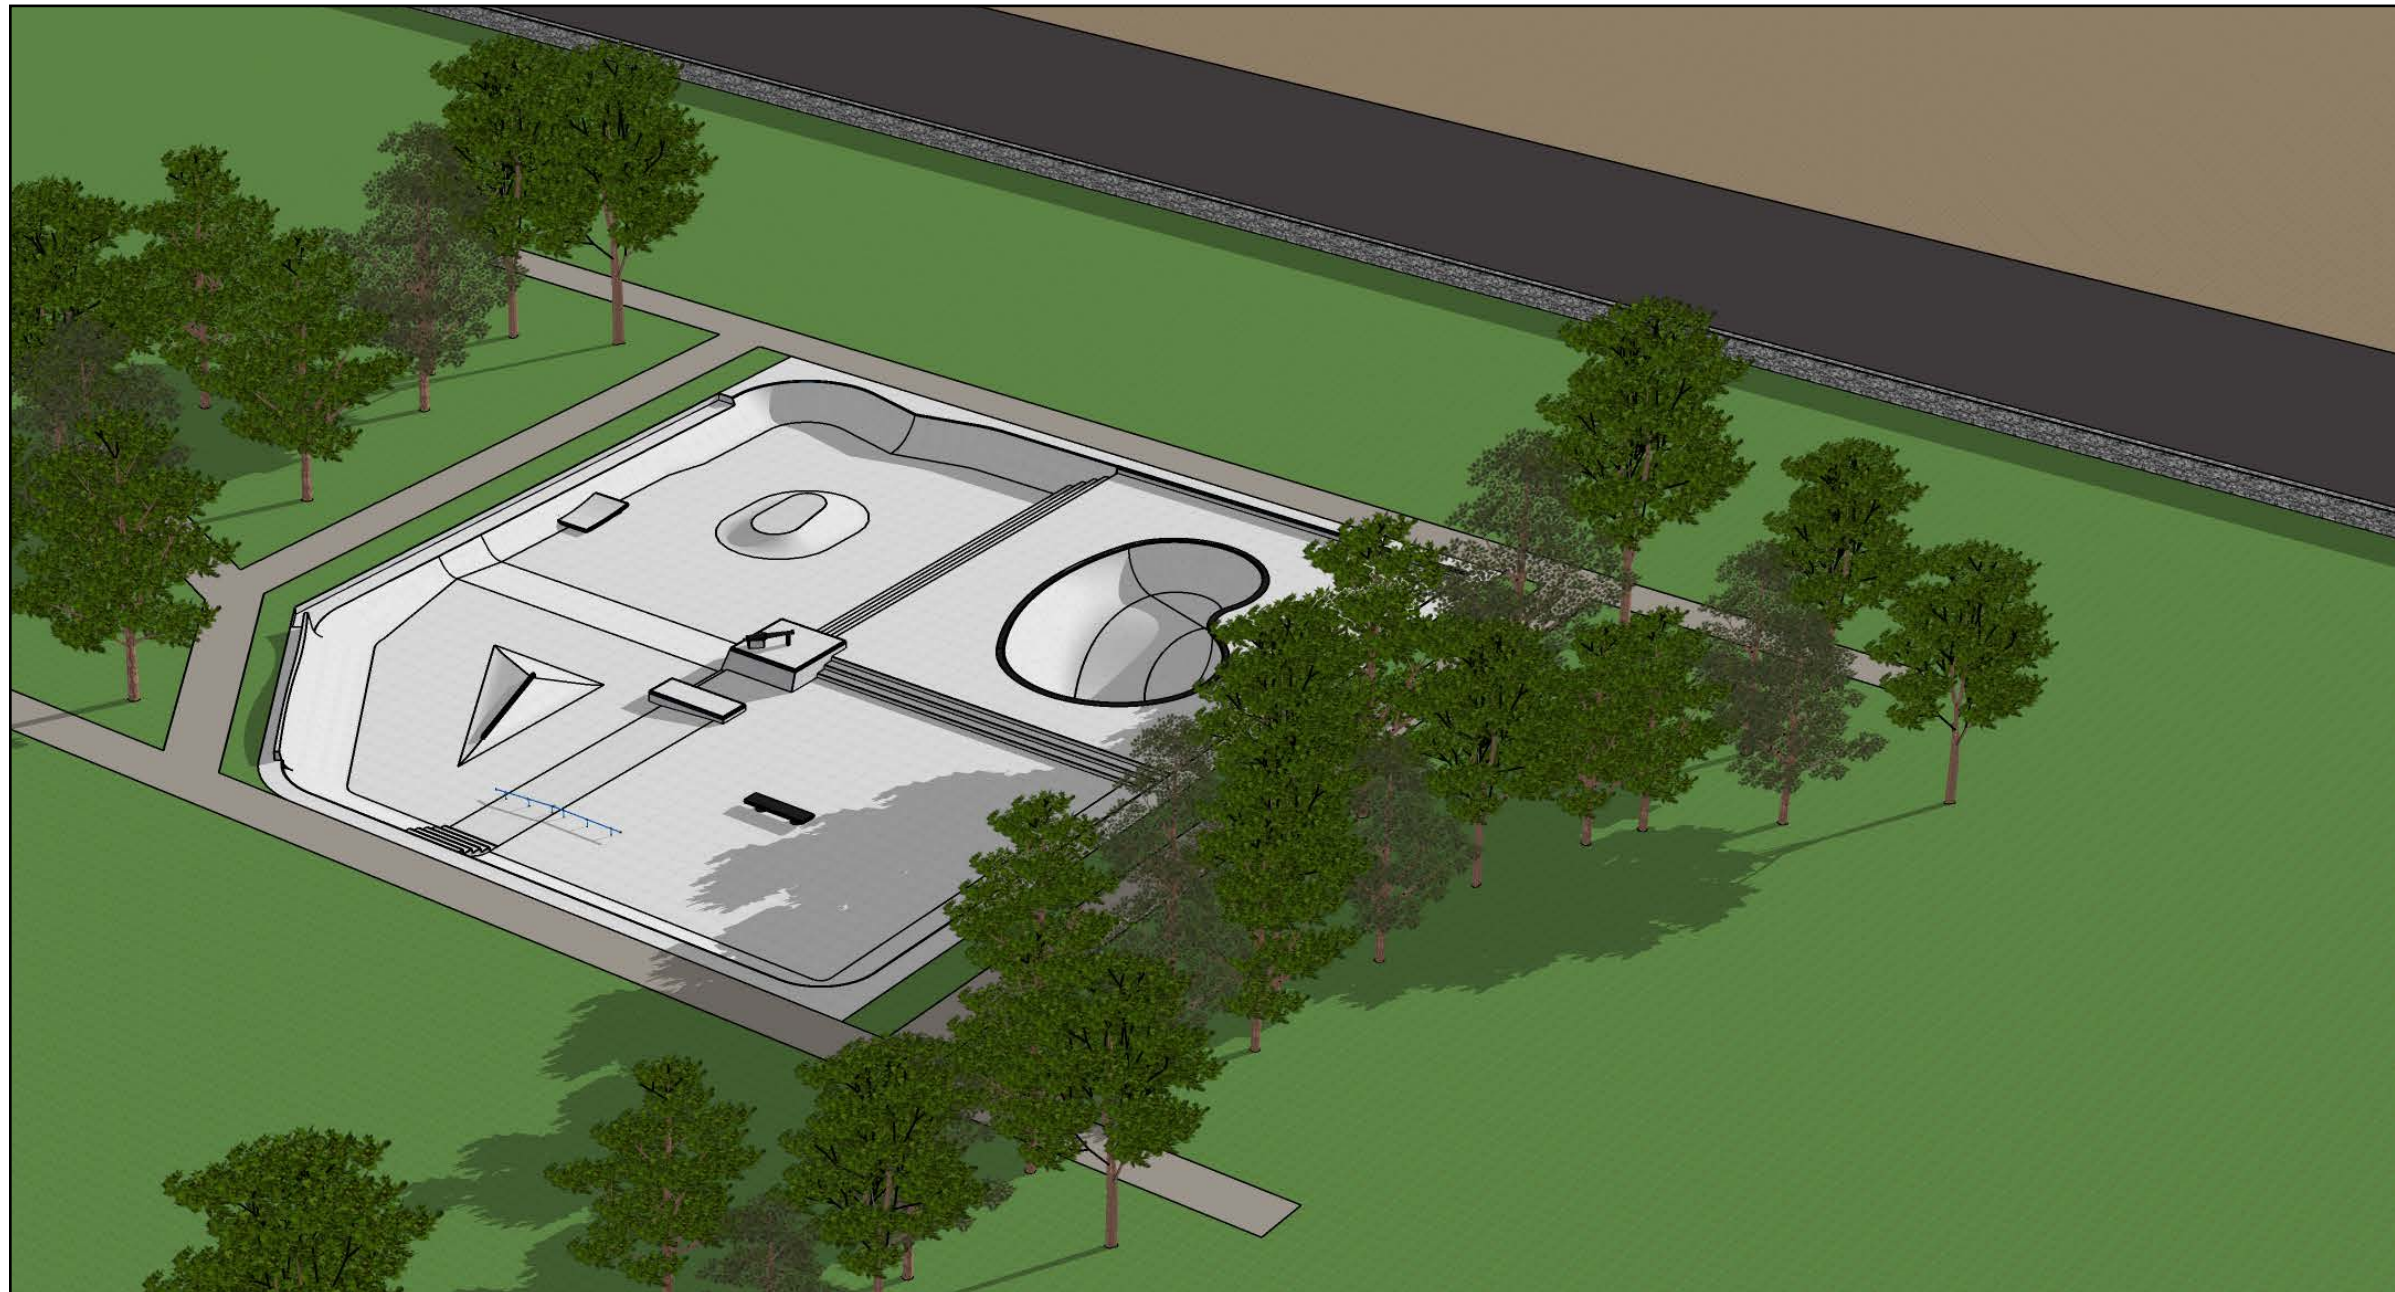

1855 M2

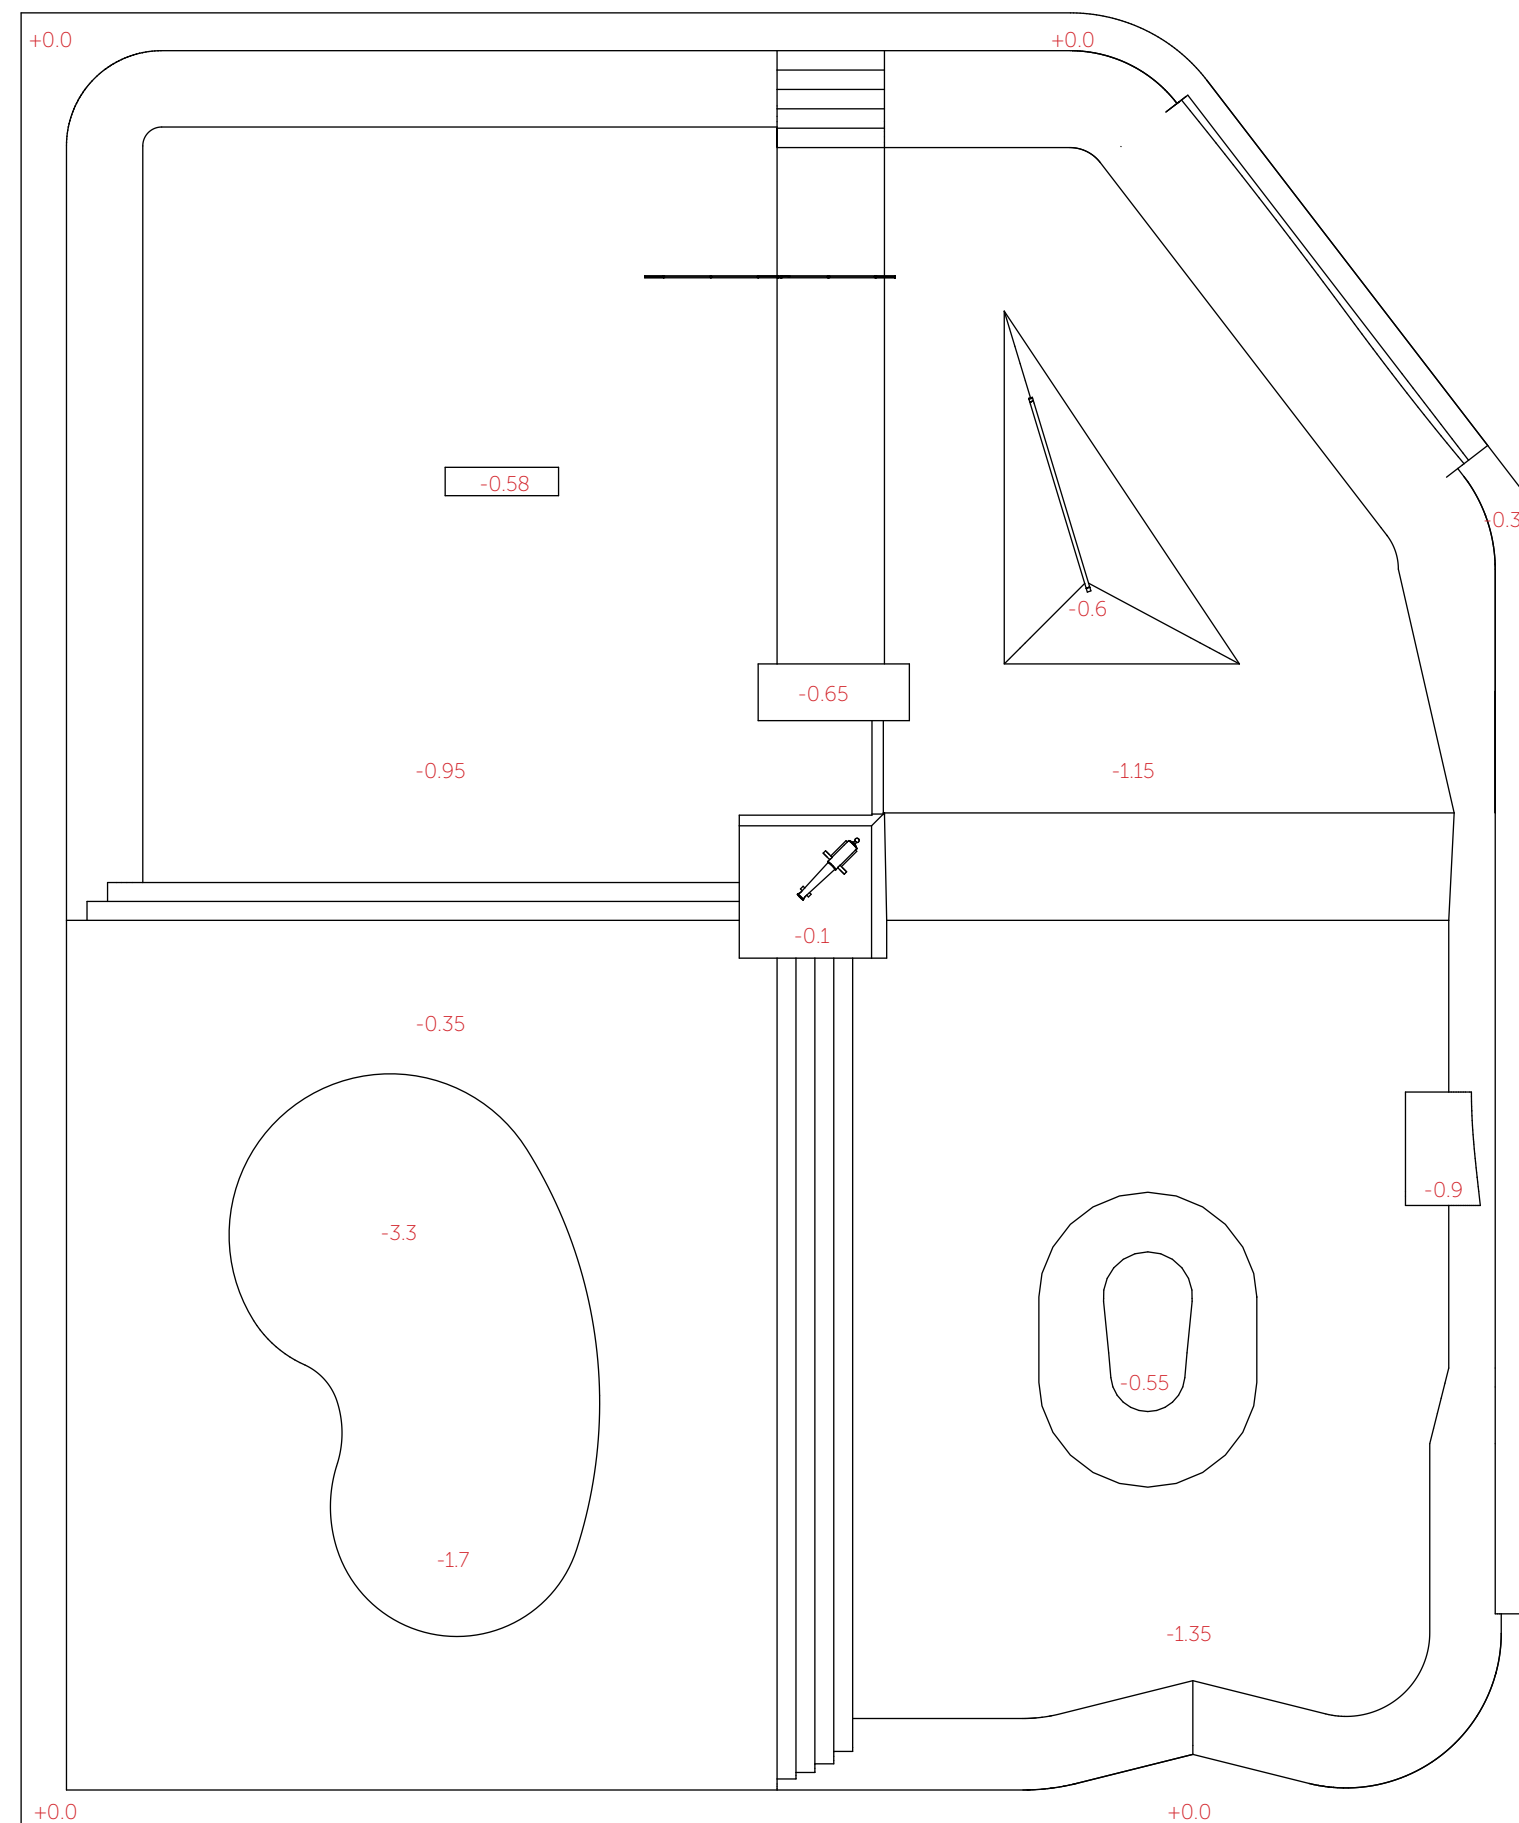

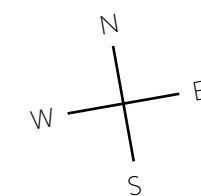

CORONATION PARK

Inspired by the rich history of Jersey, the Coronation Park skatepark houses a big 'Jersey barrier' and a 'cannon bunker' in the center of the skatepark, guarding the Jersey flag.

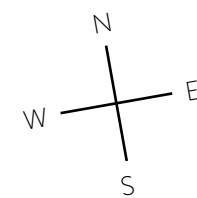

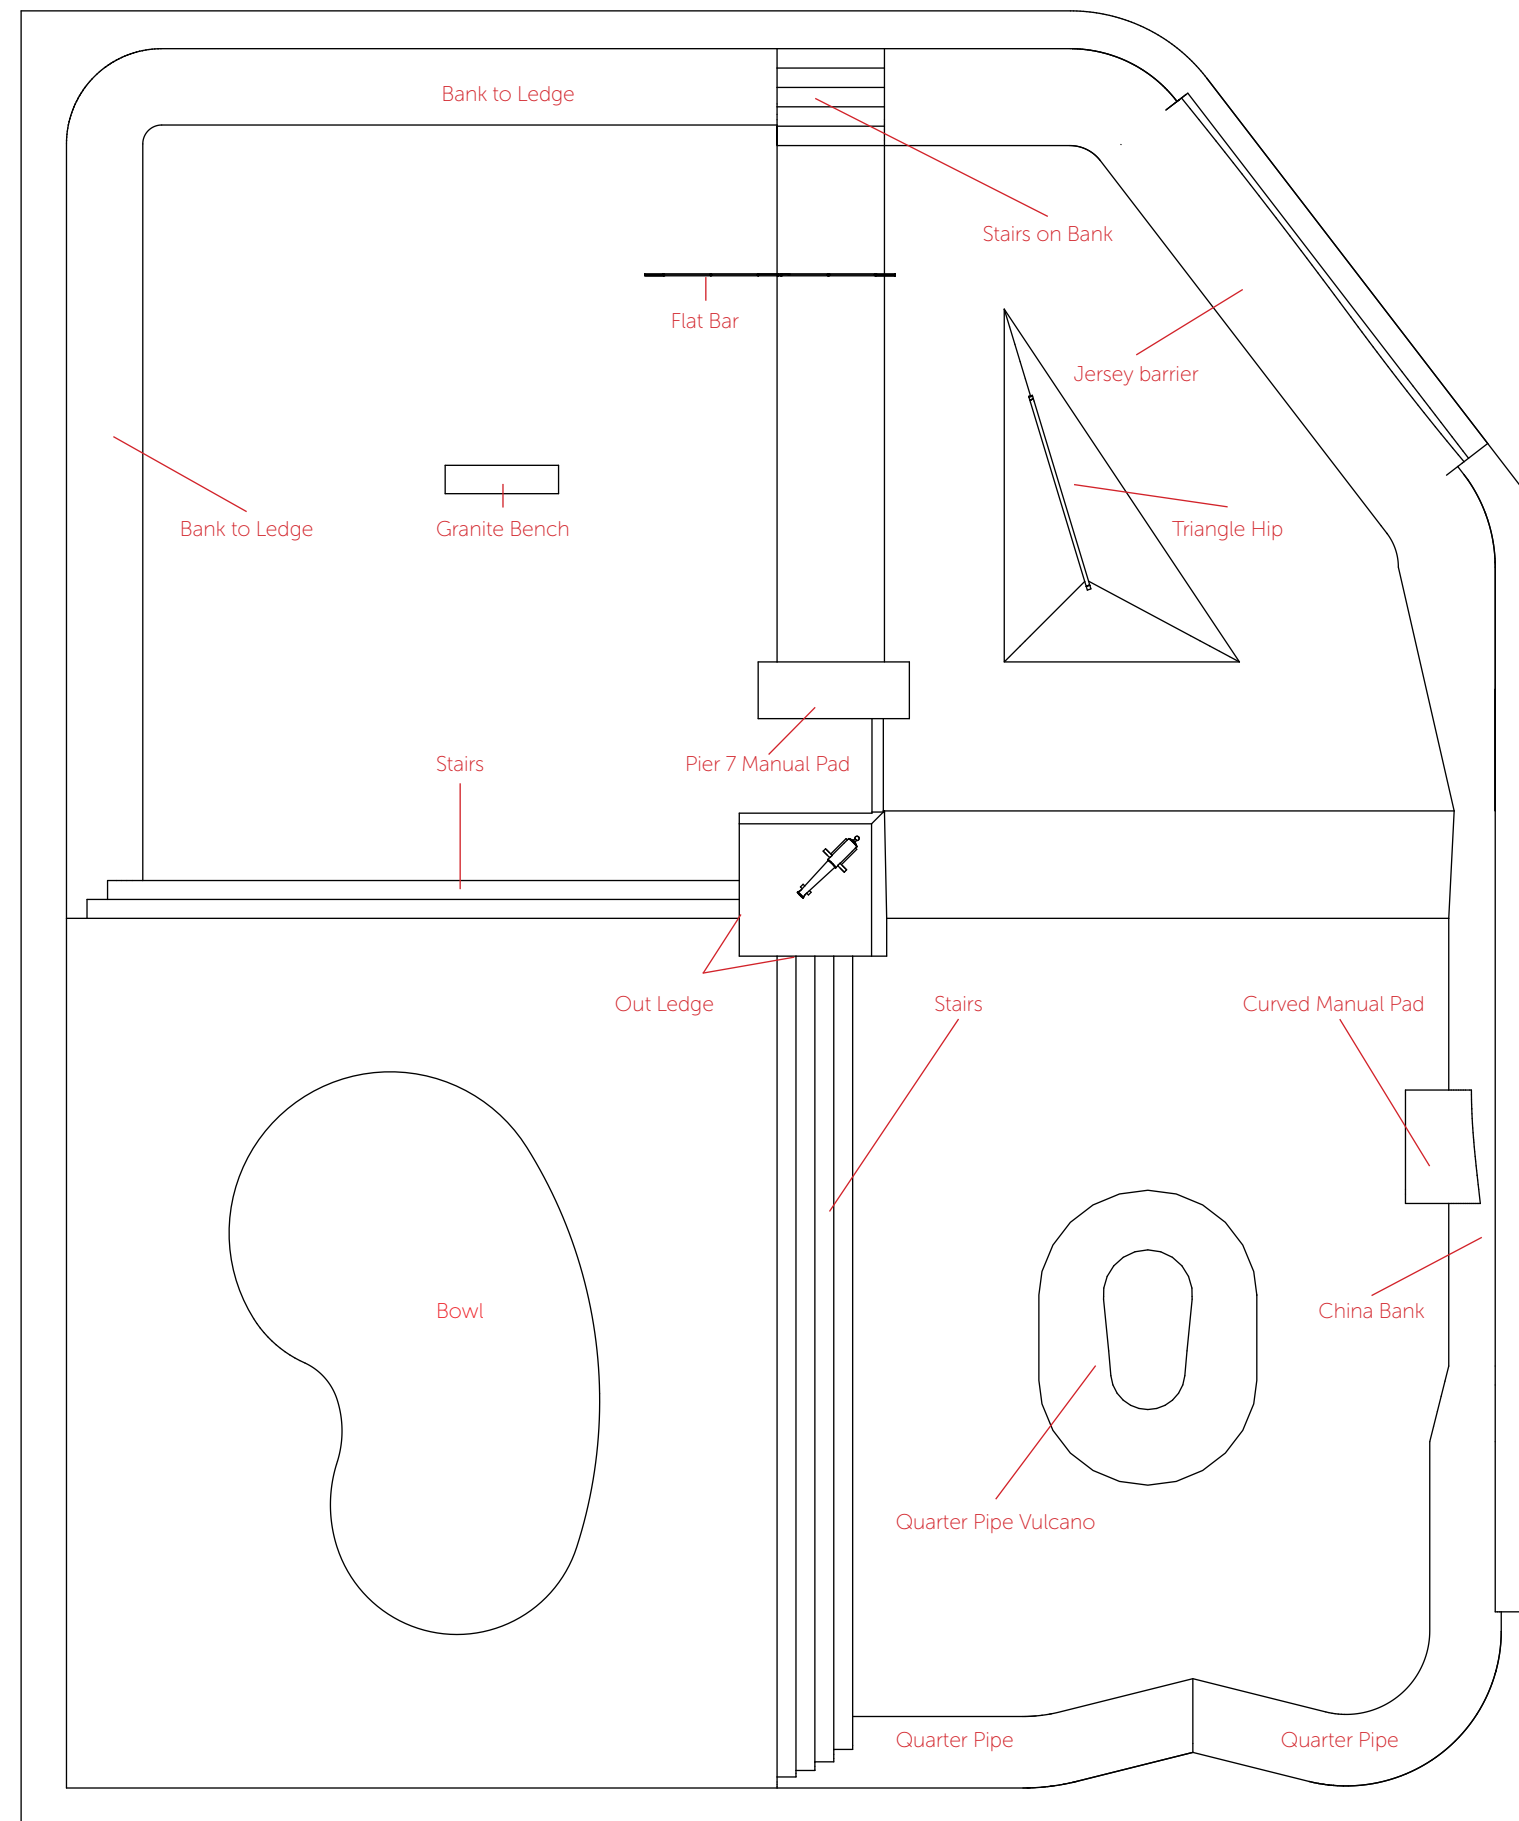

The entire skatepark is submerged into the beautiful lush landscape of Coronation Park, so that views of the park are kept intact and unobstructed. Besides the historically inspired obstacles, the skatepark has a number of traditional elements that are split into three zones. The different zones appeal to different kind of skateboarding and skill levels. The beginner zone has mellow banks, rails and benches, while the intermediate zone has steeper banks, quarter pipes and hips. The expert zone houses a bowl with vertical walls and traditional pool coping.

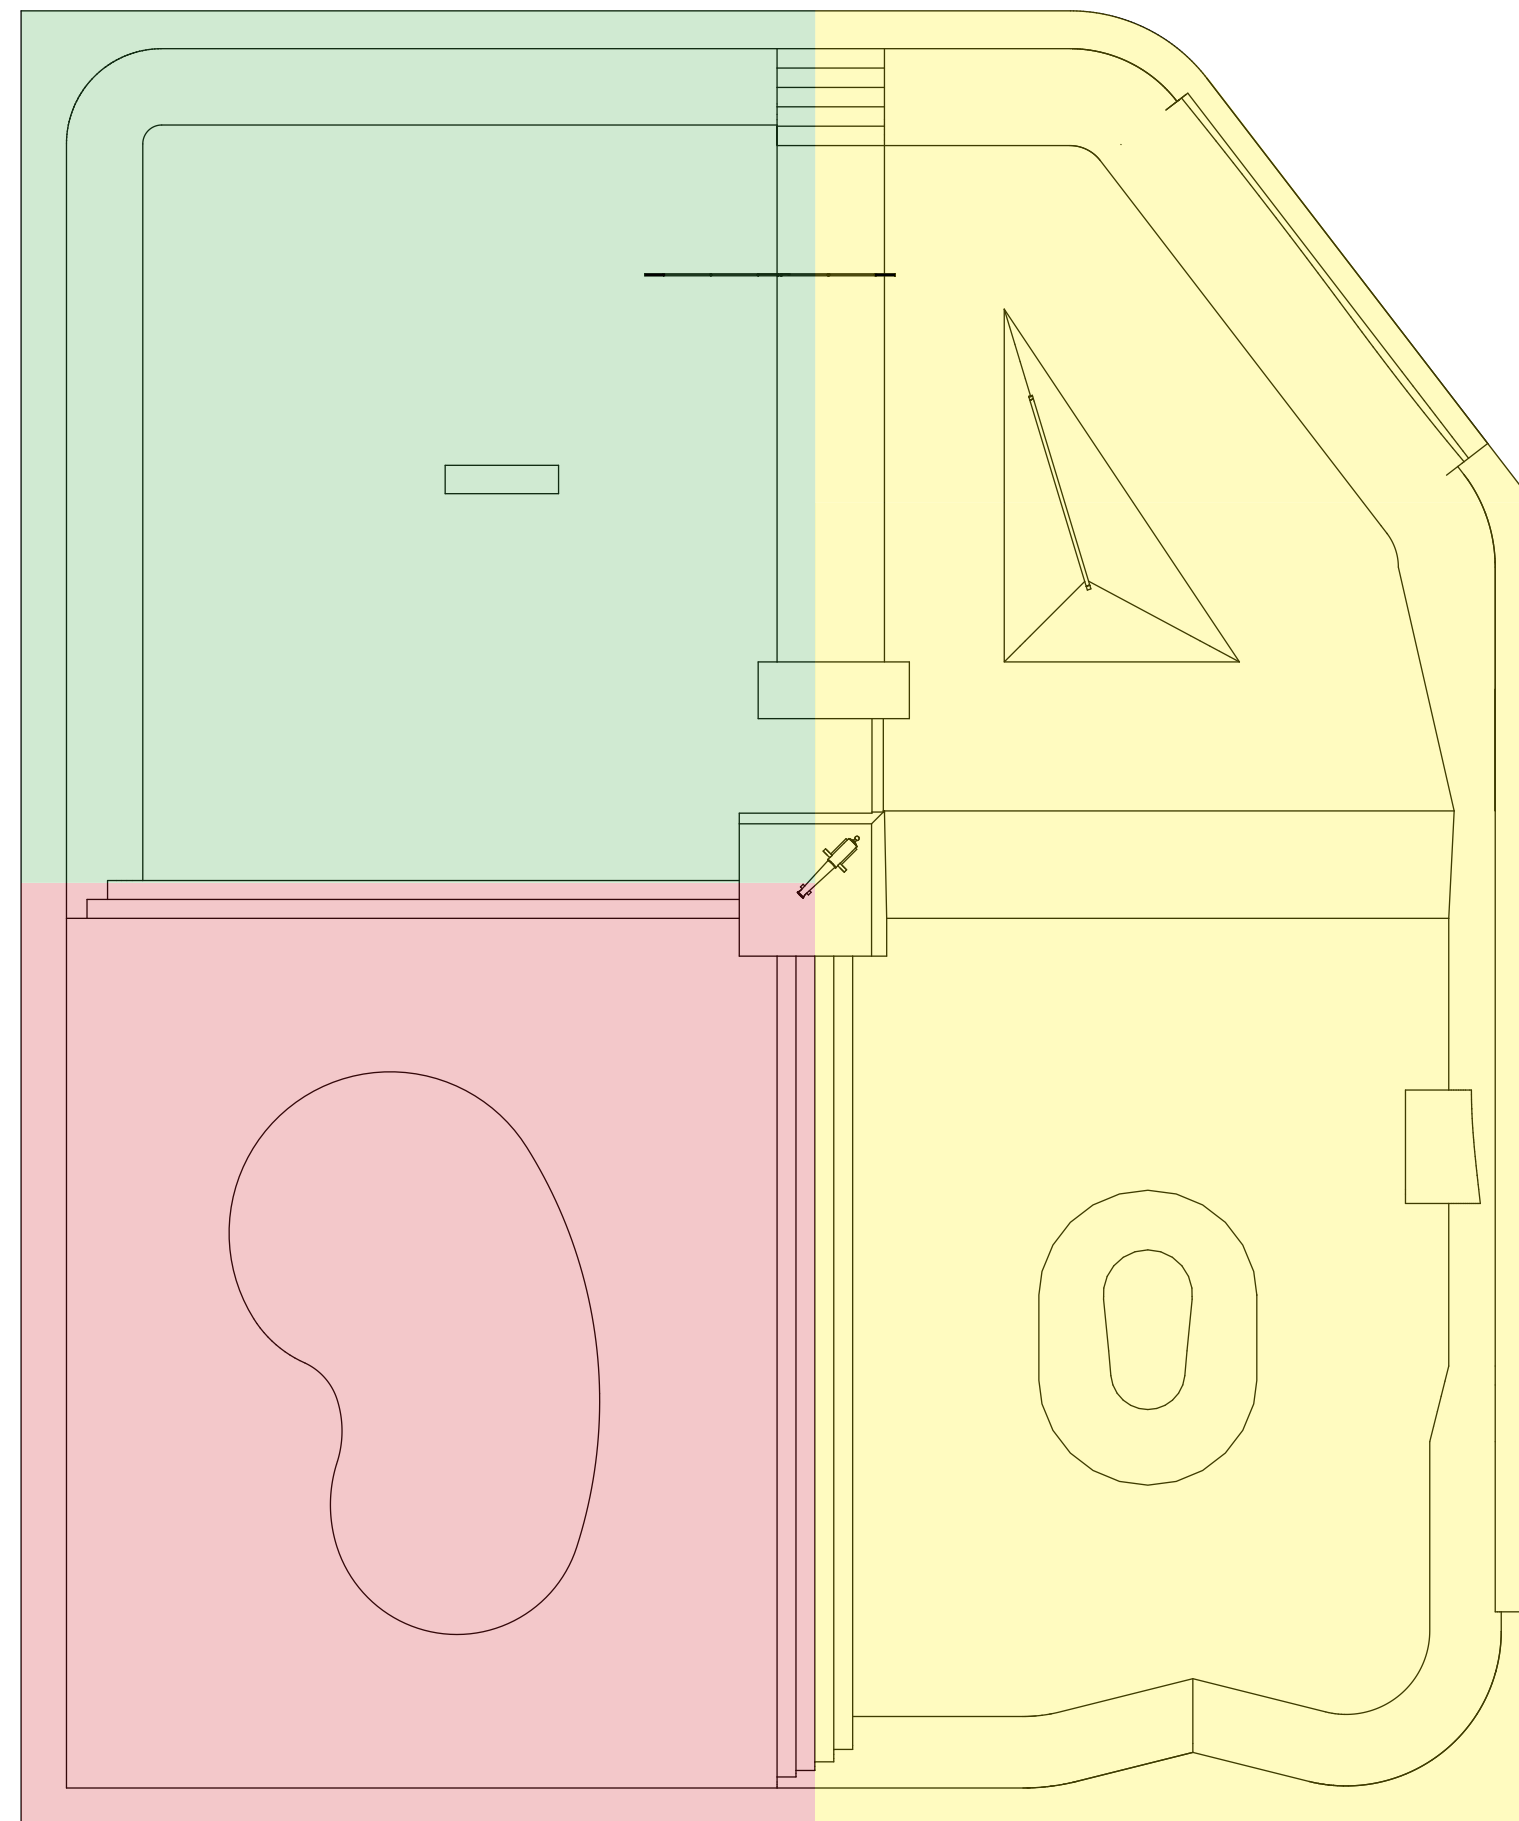

- ☐ Total Footprint 1855 m2
- ☐ Flat 1347 m2
- ☐ Bowl 192 m2
- ☐ Banks 314 m2
- ☐ Quarter Pipes 90 m2

LOCATION 3

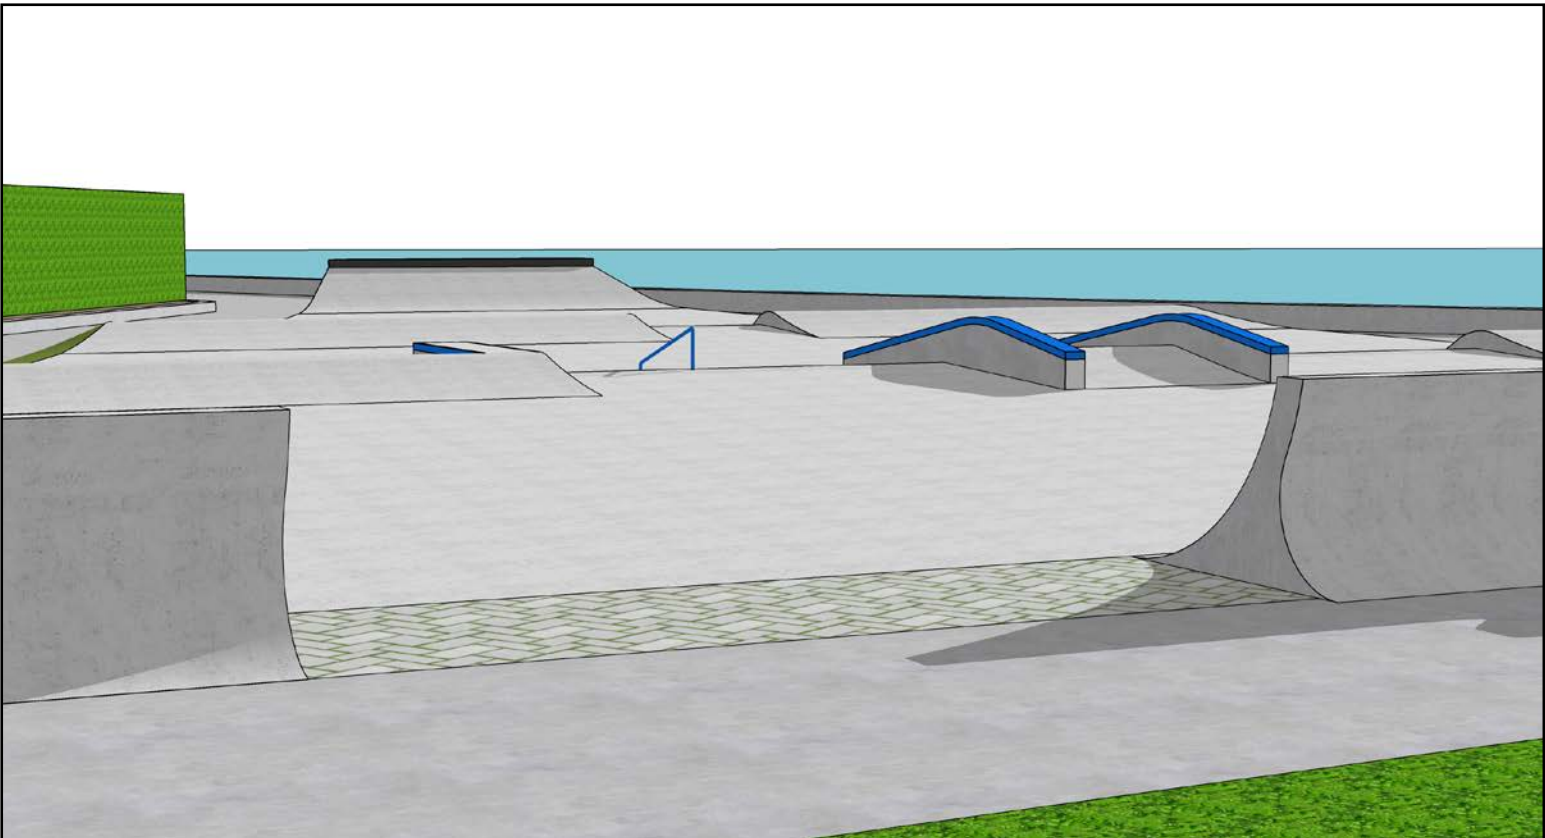

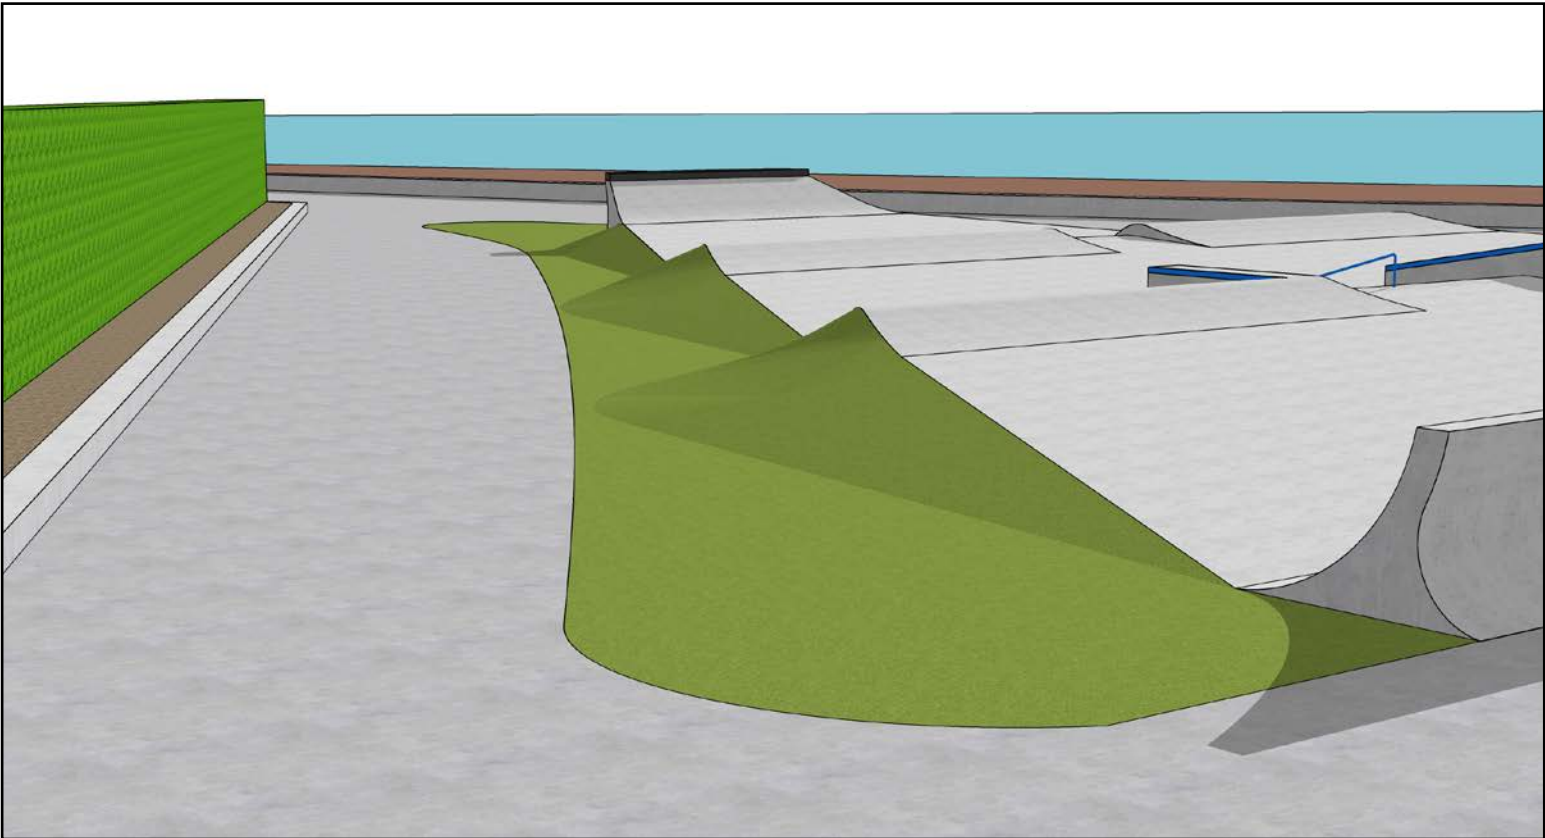

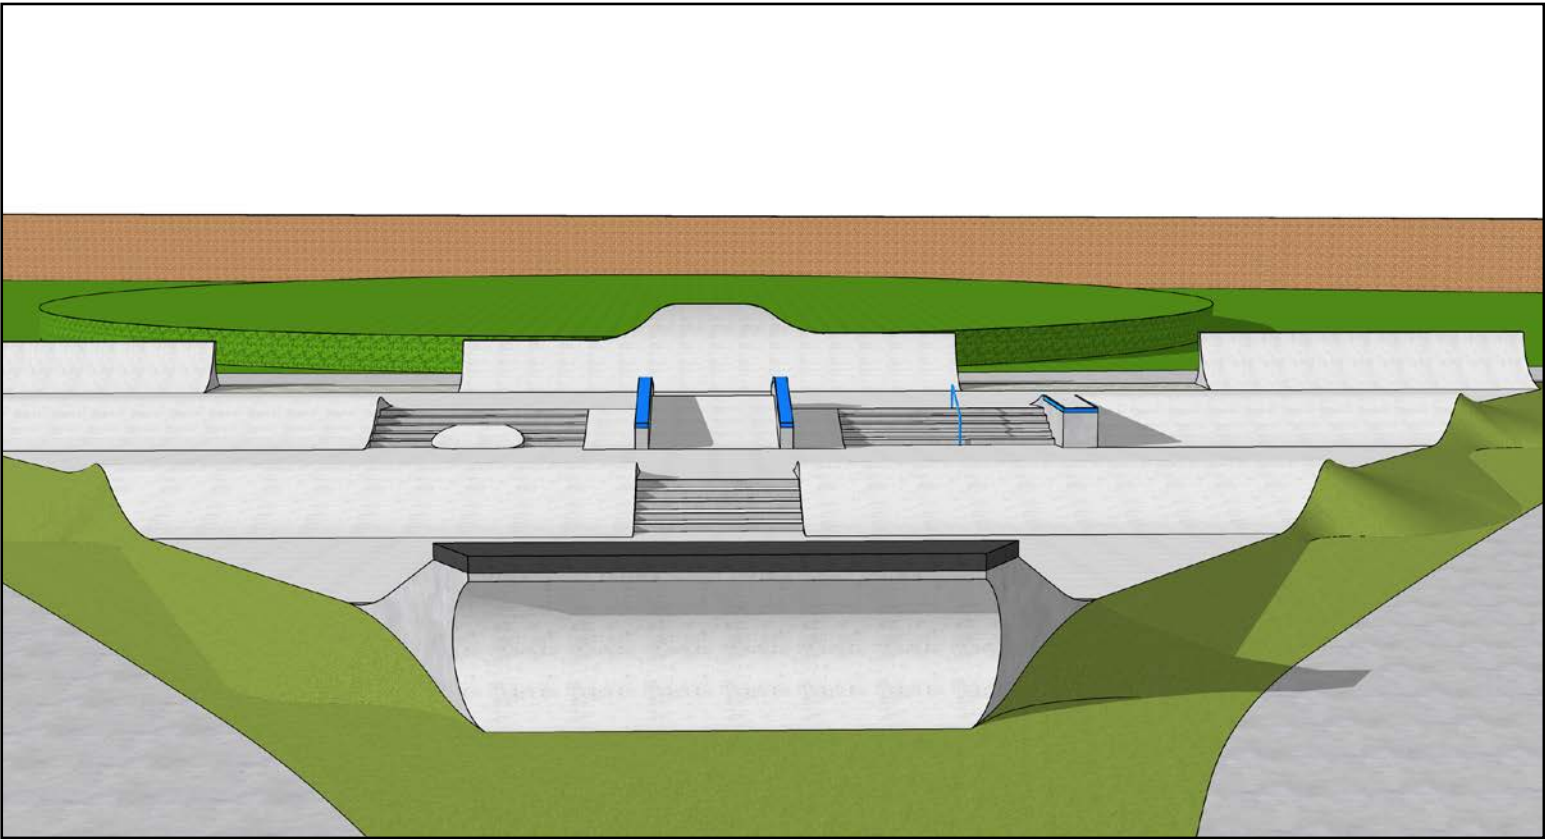

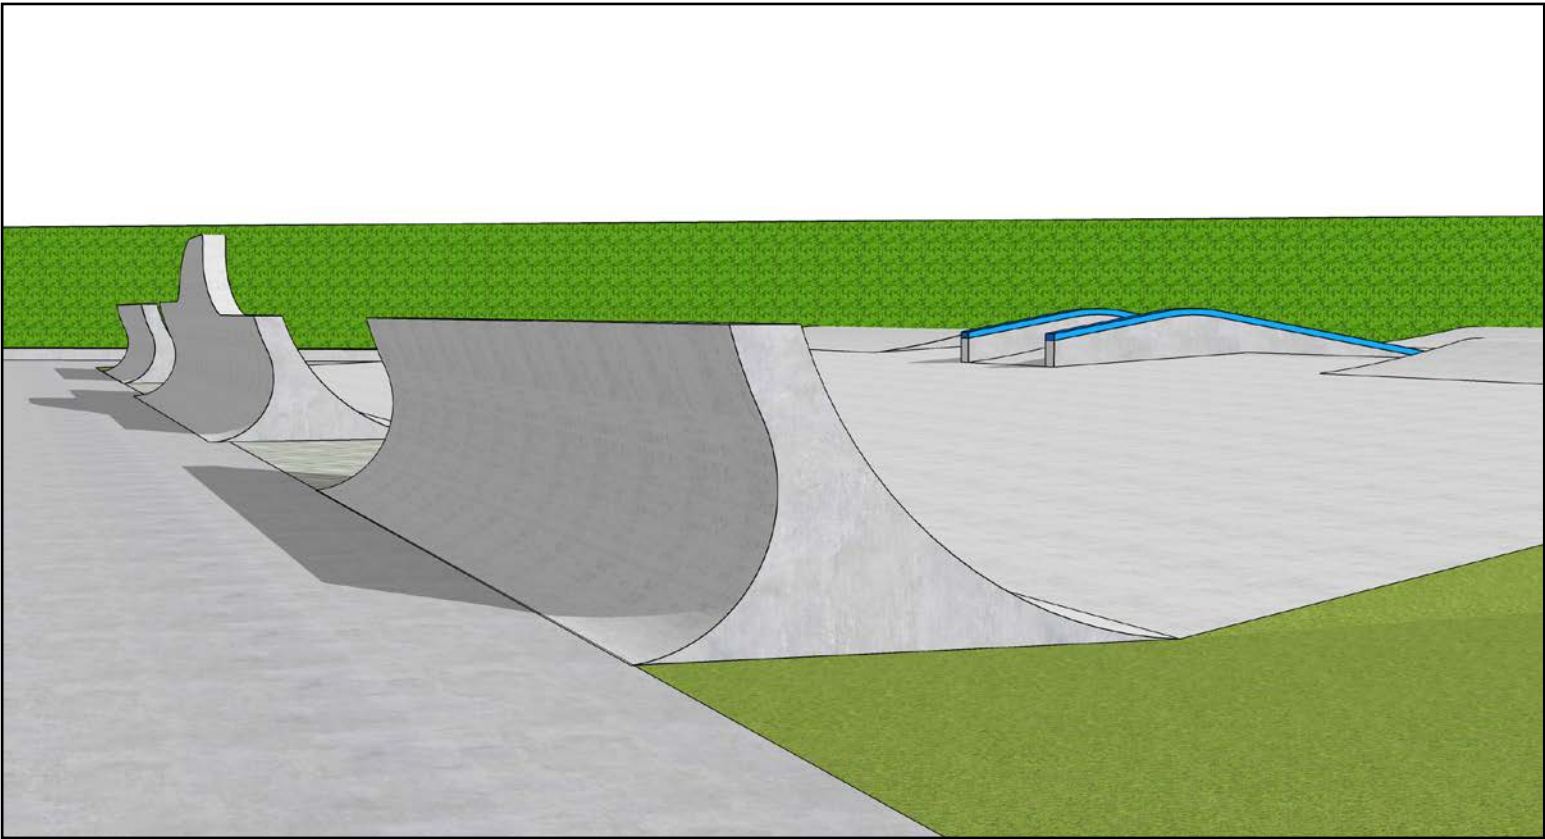

LES JARDIN DE LA MER

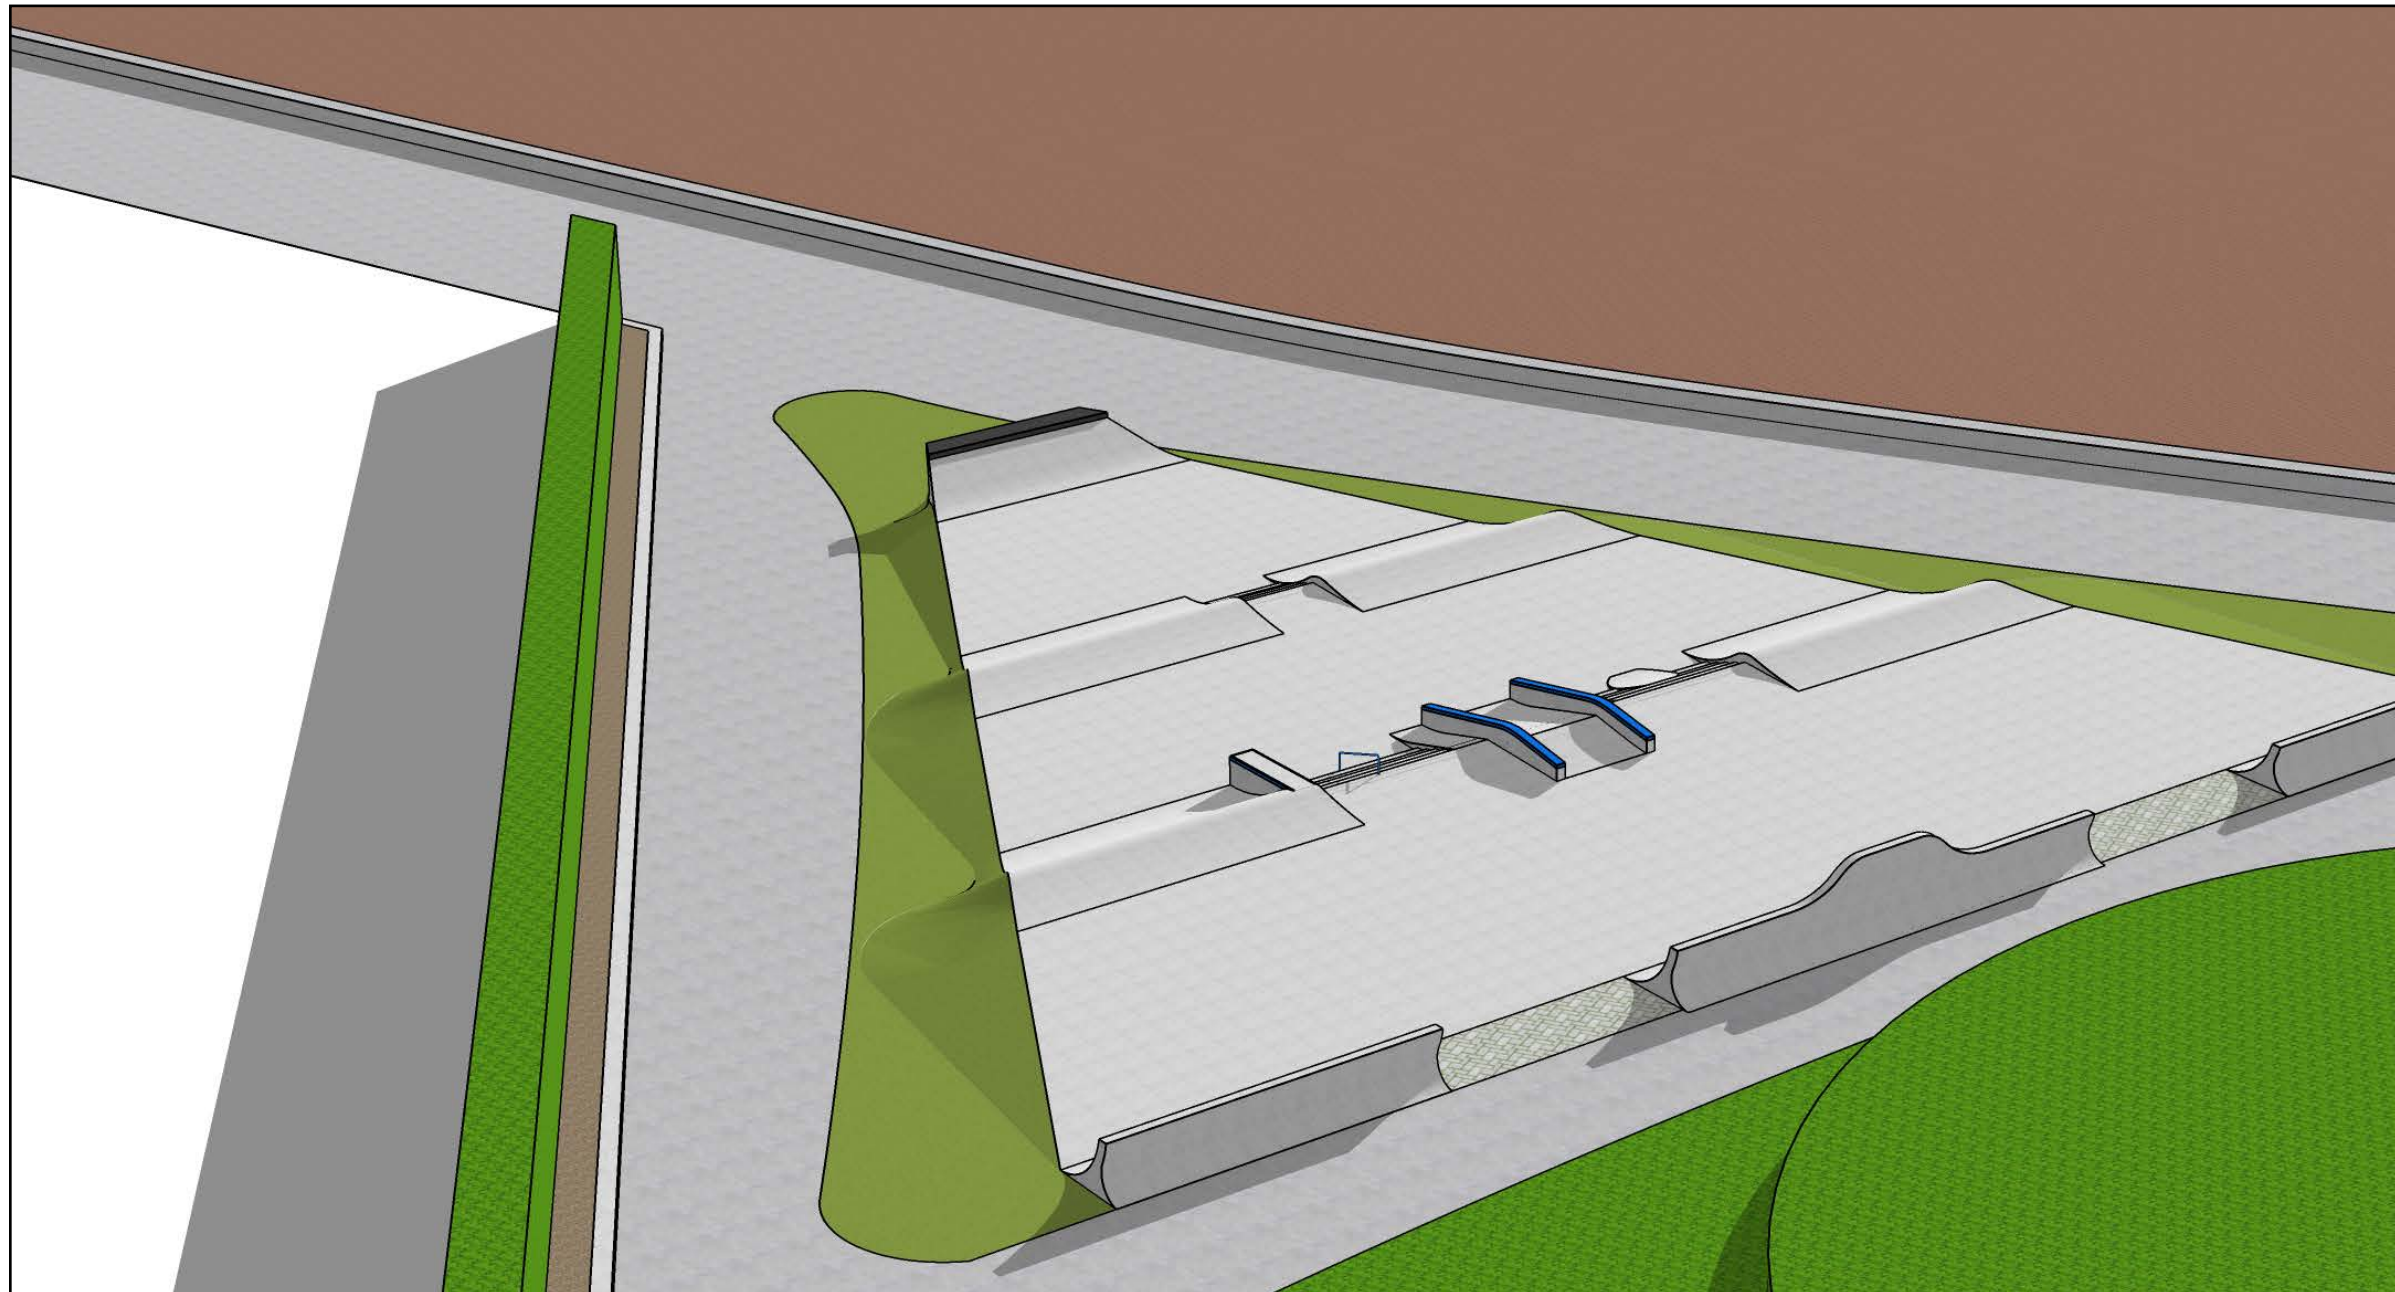

1855 M2

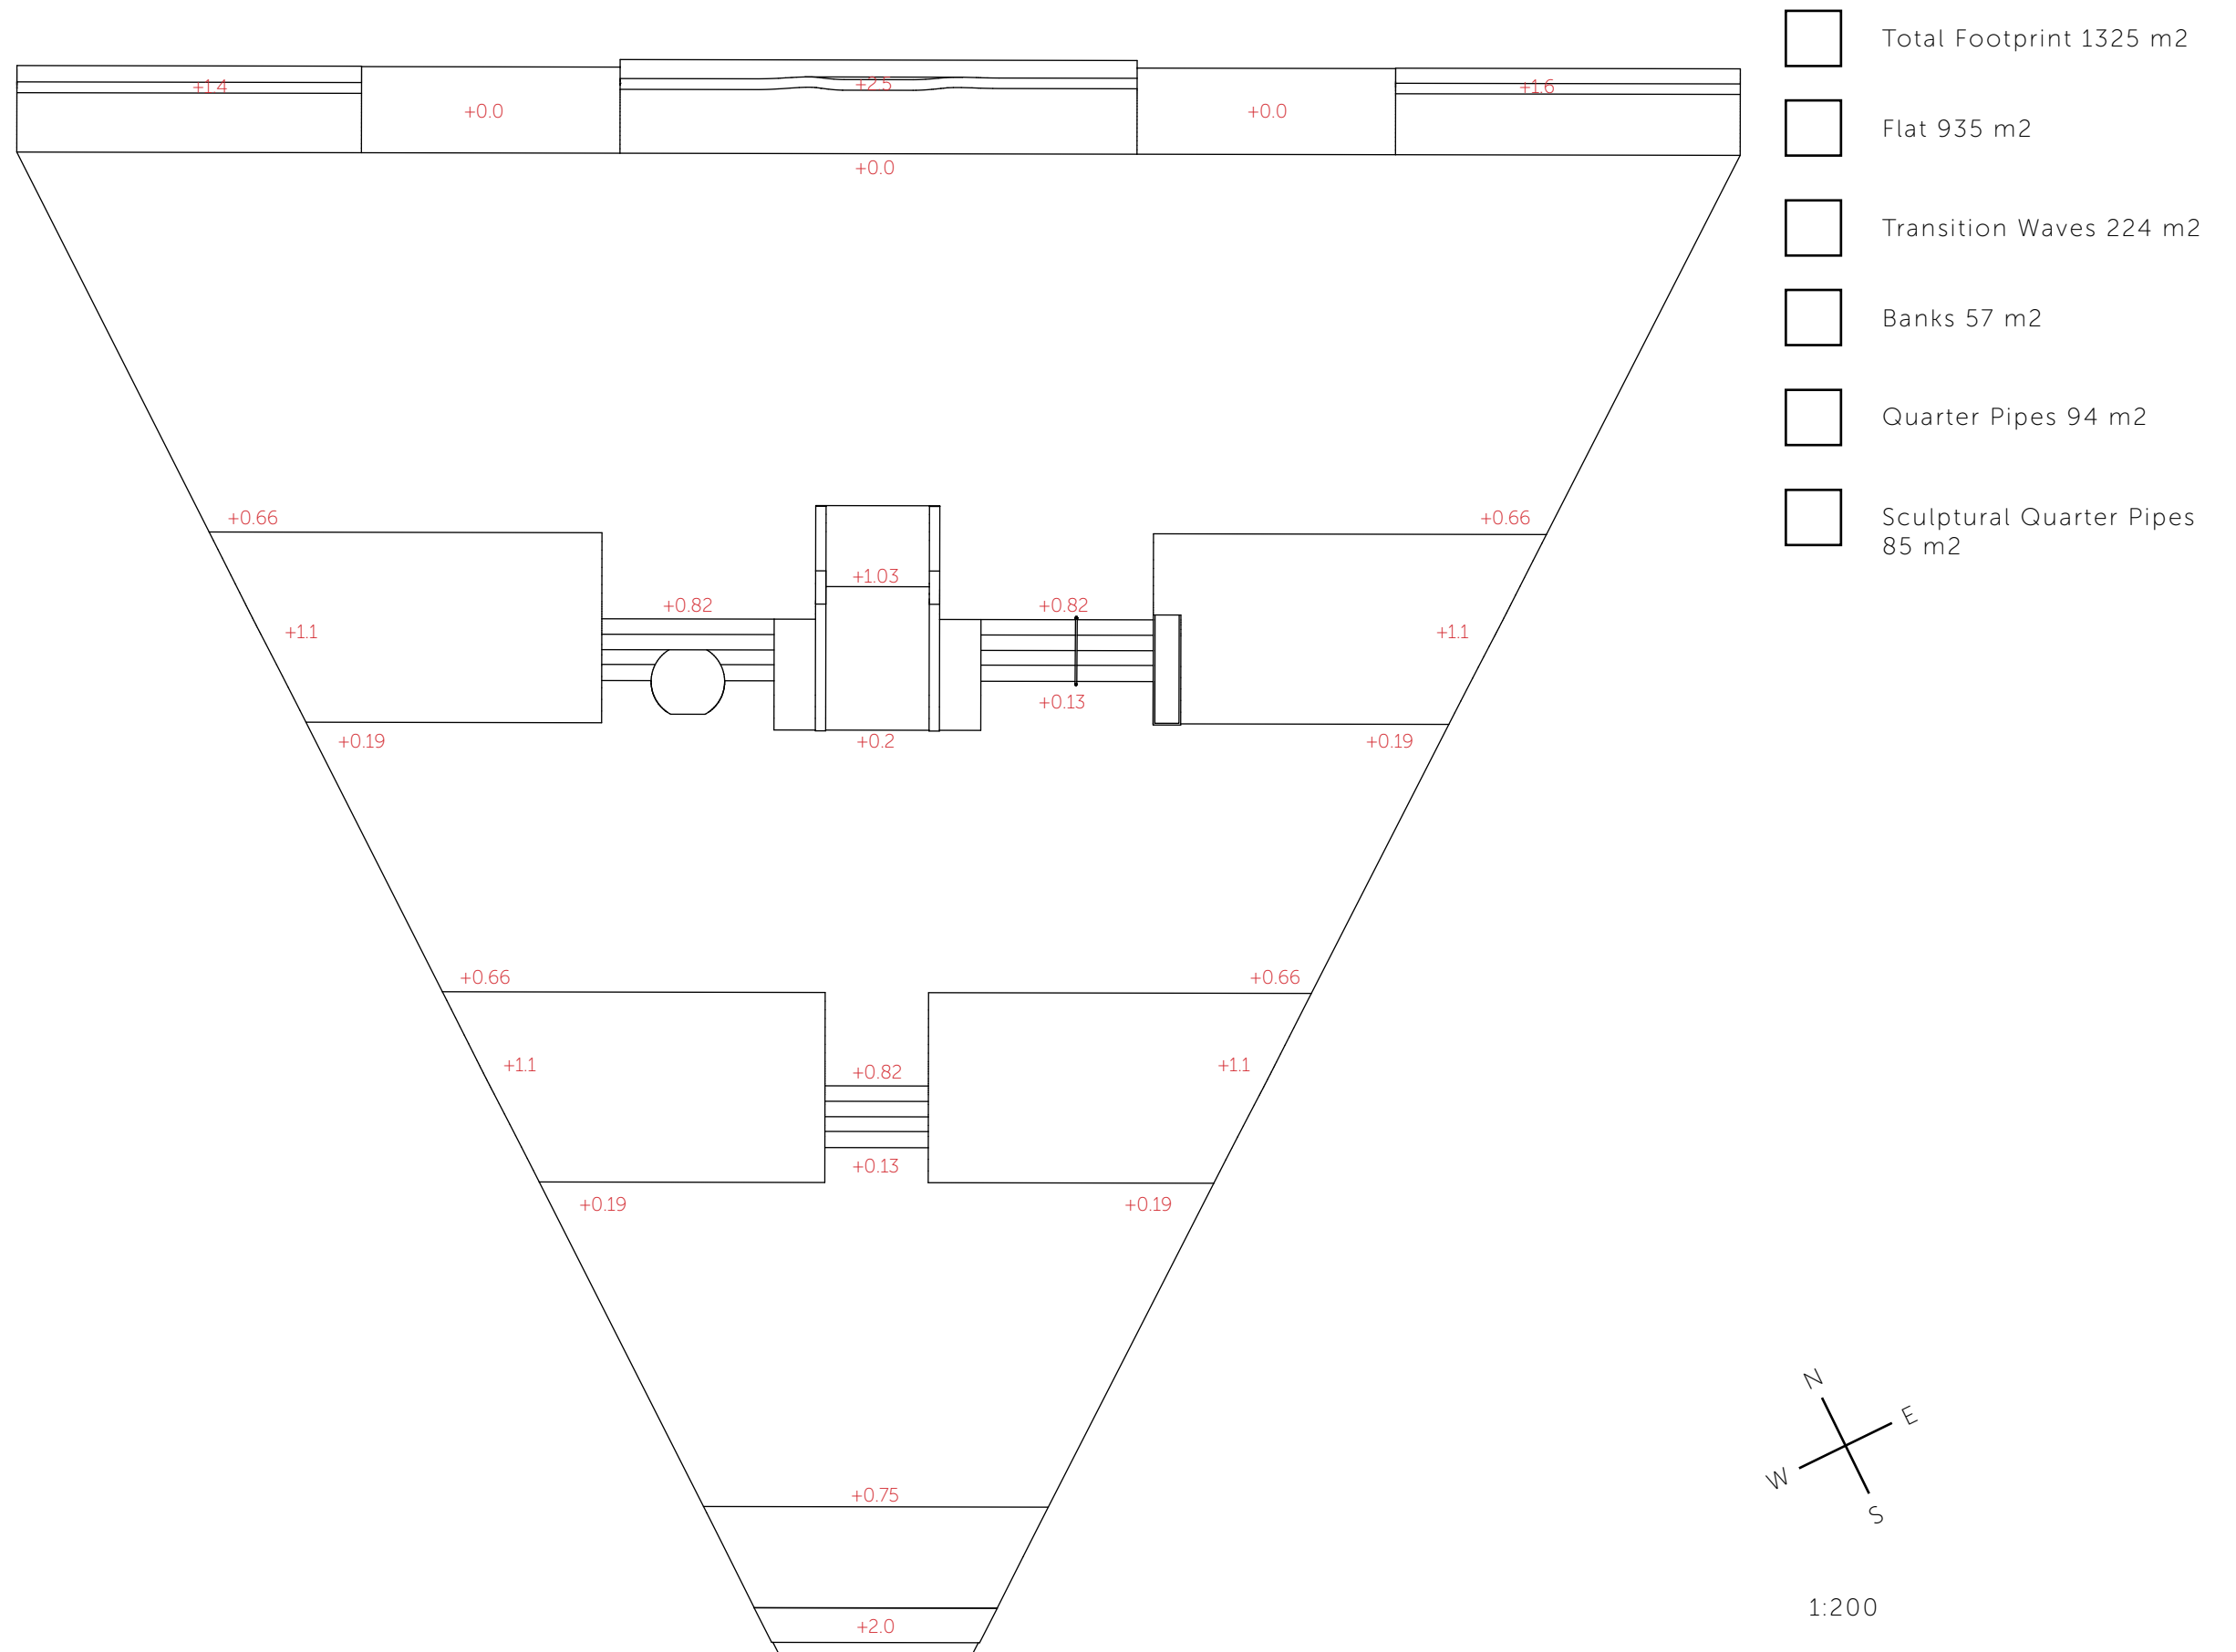

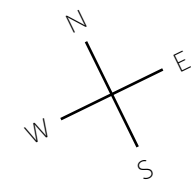

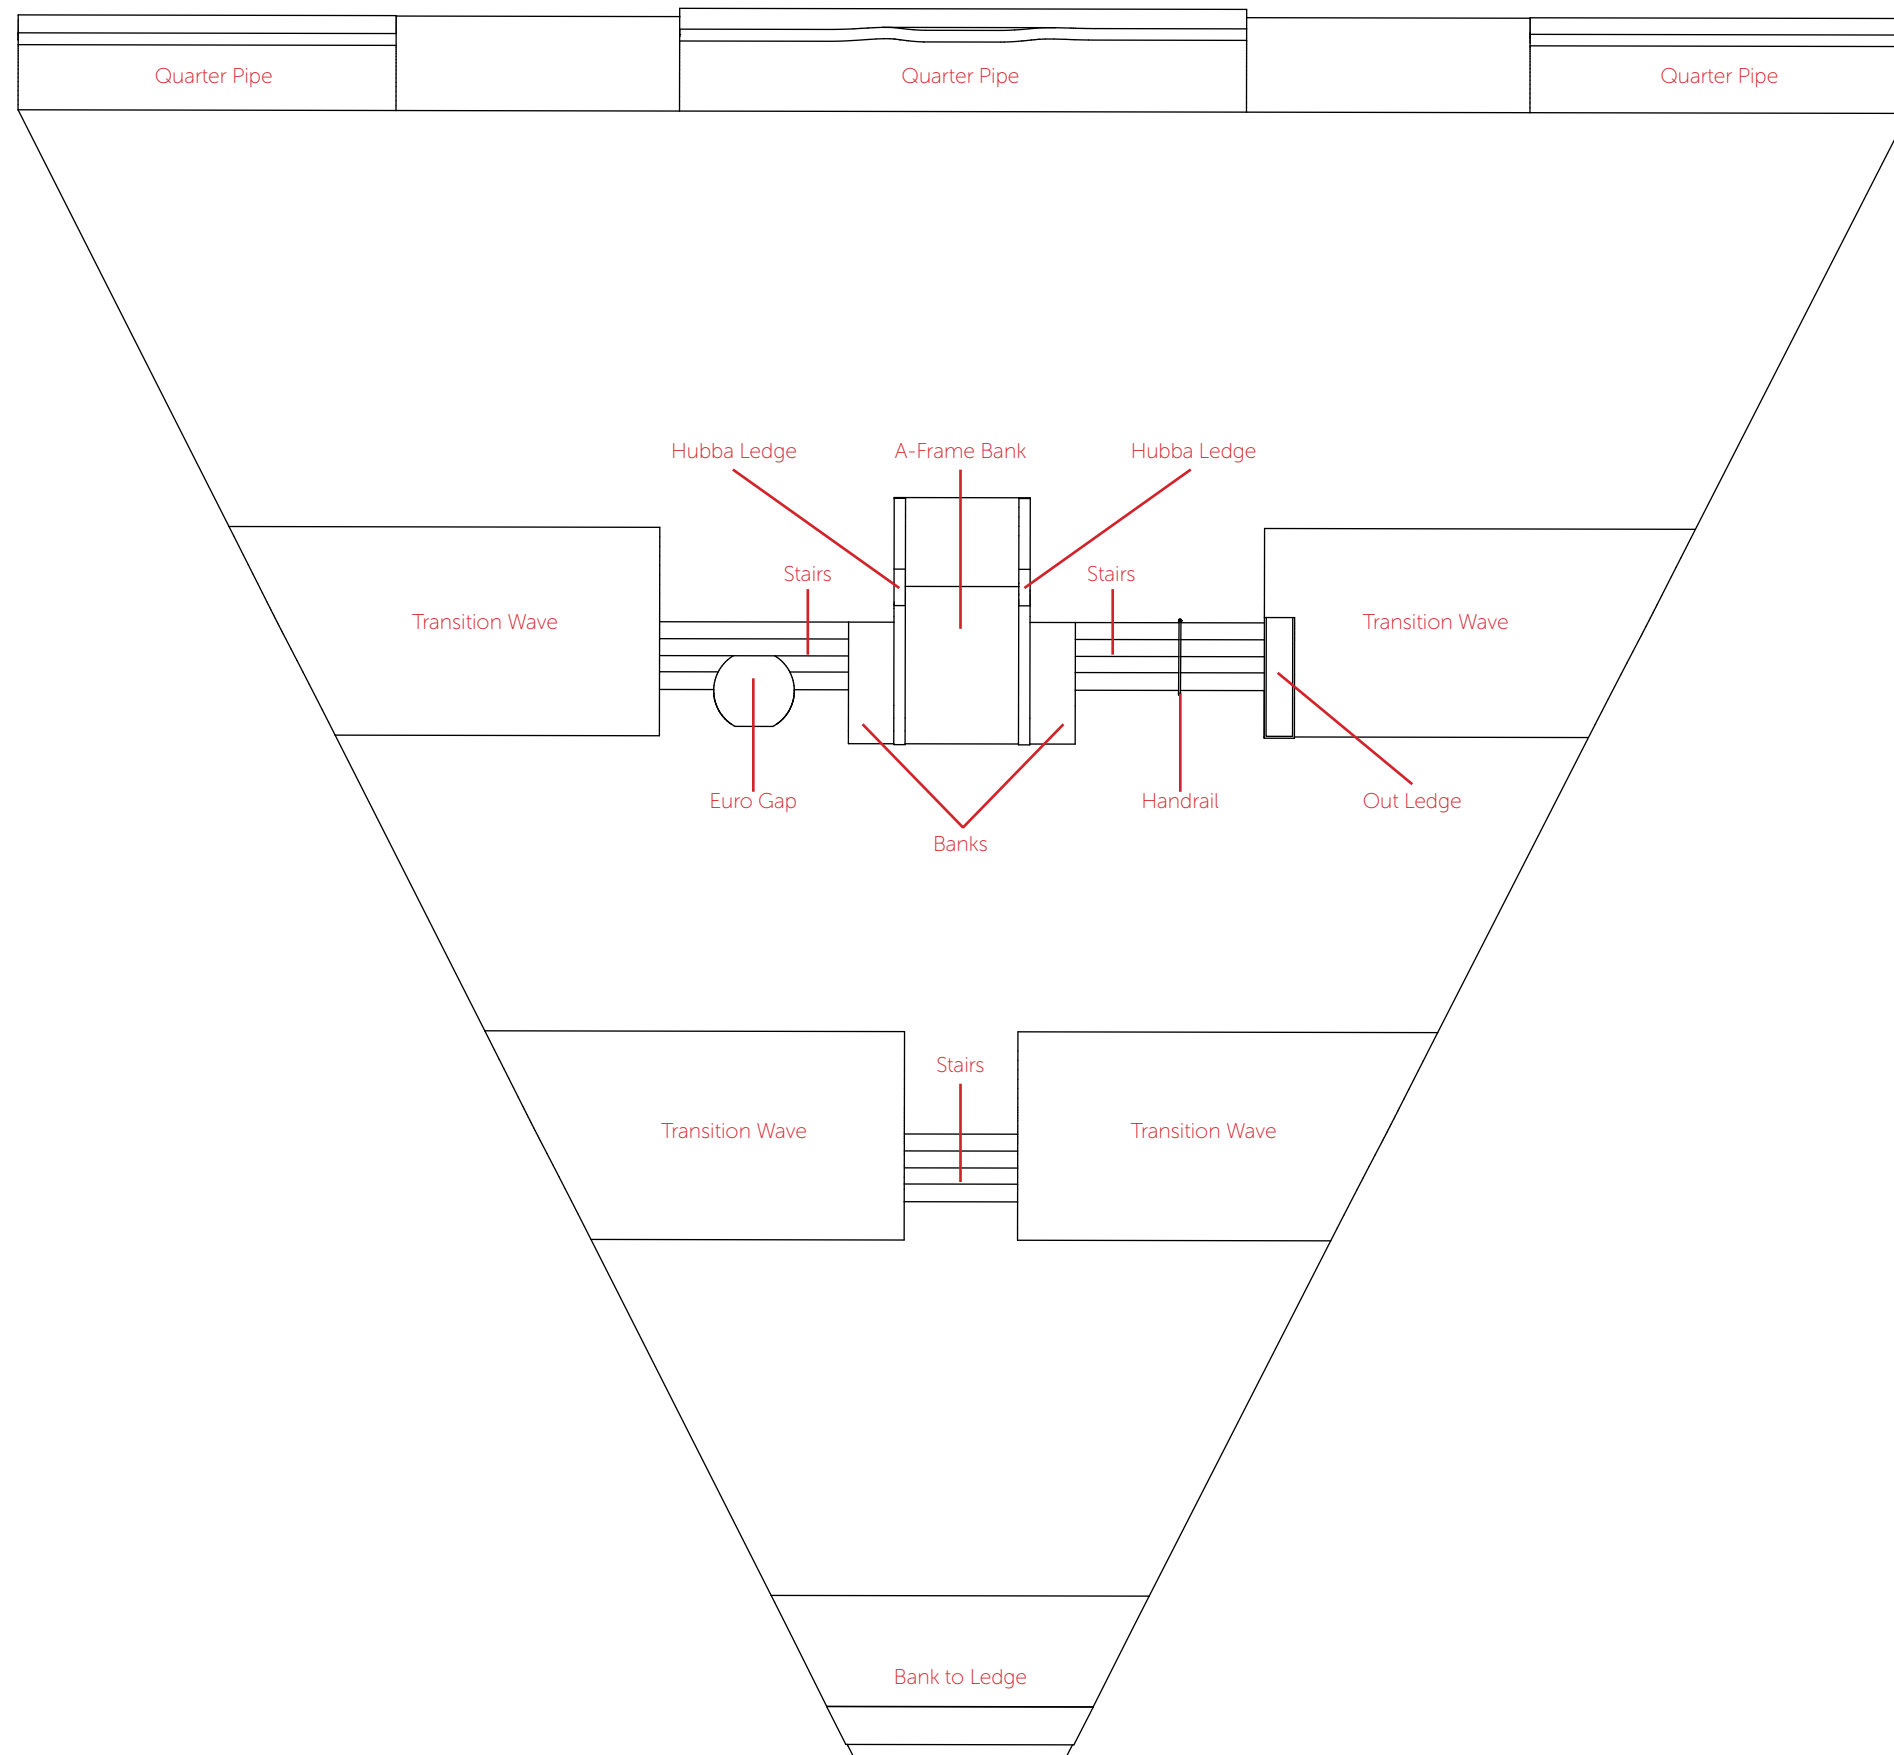

LES JARDIN DE LA MER

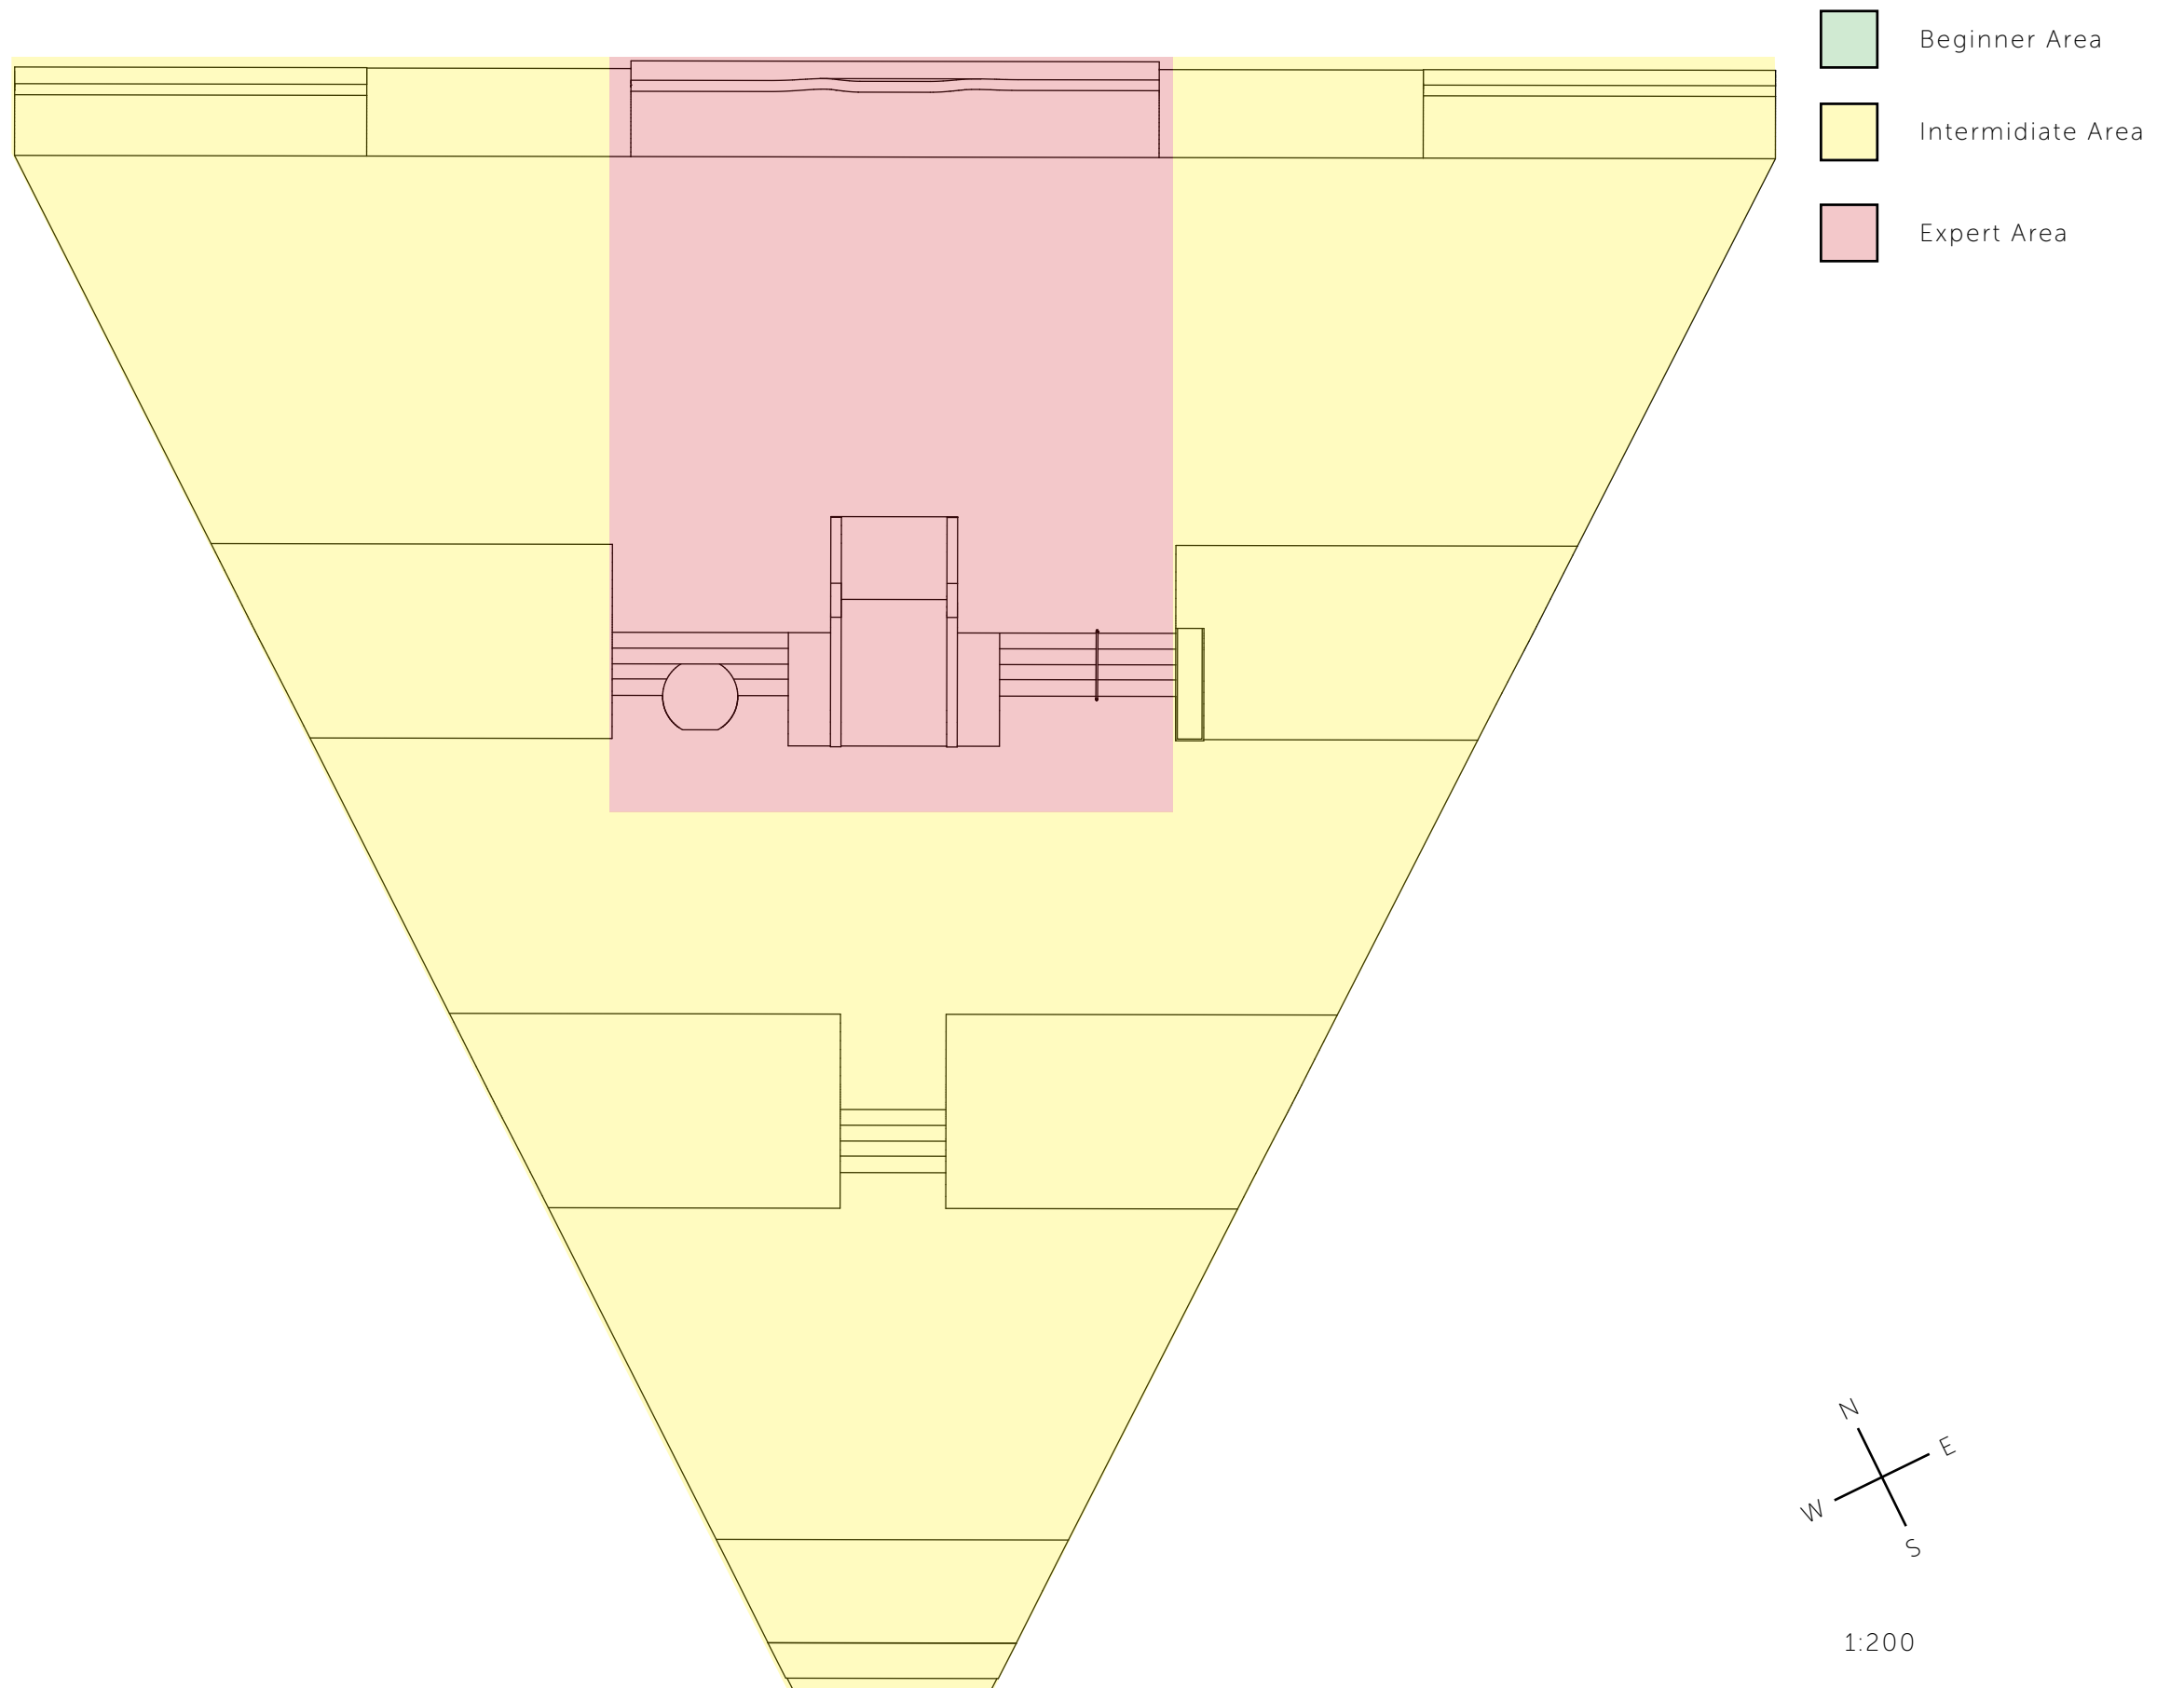

Inspired by the waves and the ever changing tides of Jersey, the skatepark concept utilizes an entirely new concept in skatepark design. Constant elevation changes create waves that run throughout the skatepark, creating constant movement through the park. The backside of the waves create a slight 'hill' linking the waves, while movement in the opposite direction, lets the skaters generate speed on the front of the wave itself. A technical street section runs down the middle, while quarter pipes, banks and waves create flow around the perimeter of the skatepark.

The quarter pipes and the bank are created in a dramatic and sculptural form, that will create a unique and beautiful space on the promenade, that will attract tourists and locals alike.
